The Concise Oxford Companion to African American Literature William L. Andrews, Frances Smith Foster, Trudier Harris, 2001-02-15 A breathtaking achievement this Concise Companion is a suitable crown to the astonishing production in African American literature and criticism that has swept over American literary studies in the last two decades It offers an enormous range of writers from Sojourner Truth to Frederick Douglass from Zora Neale Hurston to Ralph Ellison and from Toni Morrison to August Wilson It contains entries on major works including synopses of novels such as Harriet Jacobs's *Incidents in the Life of a Slave Girl* Richard Wright's *Native Son* and Lorraine Hansberry's *A Raisin in the Sun* It also incorporates information on literary characters such as Bigger Thomas Coffin Ed Johnson Kunta Kinte Sula Peace as well as on character types such as Aunt Jemima Brer Rabbit John Henry Stackolee and the trickster Icons of black culture are addressed including vivid details about the lives of Muhammad Ali John Coltrane Marcus Garvey Jackie Robinson John Brown and Harriet Tubman Here too are general articles on poetry fiction and drama on autobiography slave narratives Sunday School literature and oratory as well as on a wide spectrum of related topics Compact yet thorough this handy volume gathers works from a vast array of sources from the black periodical press to women's clubs making it one of the most substantial guides available on the growing exciting world of African American literature *The Lever of Riches* Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide

lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
