AMERICAN INTERNATIONAL LAW CASES Fourth Series 2009 VOLUME 2 Oceana Editorial Board,2010-12-24 AILC is an annual case law reporter that provides the full text of U S court opinions involving international law issues The courts covered include all U S federal district courts federal appellate courts and the U S Supreme Court as well as some state courts the U S Court of Claims the U S Court of International Trade and the U S Tax Court The series seeks to provide not every single case in which a court refers to international law but rather all cases that analyze at least one international law issue in depth The list of subjects addressed by these volumes is vast and changes from year to year with the inclusion and prominence of most topics turning on their prevalence in a given year's jurisprudence Some consistently prominent topics are personal jurisdiction over foreign defendants deportation procedure and double taxation Over the last three editions 2006 2007 and 2008 many topics have developed rapidly and constitute a correspondingly larger portion of the volumes particularly Terrorism the Foreign Sovereign Immunities Act Forum Non Conveniens and an entirely new added topic the National Security Exception to deportation eligibility The 2008 edition of AILC also features expanded sections on family law and on the detention of terrorist suspects The U S war on terror and the crisis at Guantanamo have made that last topic a significant and dynamic component of AILC Each edition of AILC also comes framed with two practical resources for students and scholars The first is an introductory editor's note that both reviews international law's major developments for the given year and explains to readers how to use the volumes The second is a subject index to allow for targeted research Volume Two of AILC consists of cases concerning territories trusteeships boundaries and navigable waters covering marine torts and crimes and death on the high seas by wrongful act Also covered are procedural aspects including in personam jurisdiction extraterritoriality and forum selection clauses In *Atlantic Sounding Co Inc v Edgar L Townsend* the issue was whether an injured seaman may recover punitive damages for his employer's willful failure to pay maintenance and cure The court ruled that punitive damages were available as a matter of general maritime law The issue in *Jose Marcial Reyes Fuentes et al v Shannon Produce Farm Inc et al* was whether the Fair Labor Standards Act's FLSA provision provides a cause of action to

foreign workers located abroad who are denied re hire in retaliation for exercising their rights under the FLSA The court ruled that neither the FLSA nor general extraterritoriality principles stand in the way of the plaintiffs retaliation claim

Selectivity in State Aid Law and the Methods for the Allocation of the Corporate Tax Base Jérôme Monsenego,2018-06-05 High profile cases before the European Commission and the EU courts have intensified scrutiny of the link between State aid law and the taxation of multinational enterprises Certain decisions have raised questions about fiscal sovereignty and the interpretation of the rules on State aid in particular the notion of selectivity which have not been addressed in detail by existing research The combination of the evolution of the notion of selectivity in State aid law on the one hand and the need to adapt the rules for the taxation of the profits of multinational enterprises to the modern economy on the other hand makes it necessary to assess whether existing as well as alternative rules for the allocation of the corporate tax base might entail a selective treatment This book responds to the need of research in the area of State aid law applied to the taxation of the income of multinational enterprises focusing on the crucial concept of selectivity The analysis proceeds with a detailed investigation of the theoretical issues that arise when applying the selectivity test in State aid law to three methods for the allocation of the corporate tax base between the members of multinational enterprises the arm s length principle transfer pricing safe harbours and systems of formula apportionment This research project is conducted at a theoretical level without considering national provisions or particular tax treaties The author suggests an analytical framework on the application of the selectivity test to the three allocation methods It is concluded that these methods are likely to have certain selective features with varying possibilities to be justified by the inner logic of a corporate income tax system It is also demonstrated that selectivity occurs for different reasons due to the different rationales of the three allocation methods This book is intended at contributing to the academic literature on the impact of State aid law on the principles for the taxation of the income of multinational enterprises The outcome of this research project is also relevant for lawmakers who need to reconcile the imperatives of State aid law with the design of rules that match their tax policies as well as for judges or lawyers who apply the rules on State aid to tax provisions

Evgeny Vinokurov,2007-12-24 La quatri me de couverture indique Providing a fully fledged theory of enclaves and exclaves A Theory of Enclaves covers a wide scope of regions throughout the world focusing on three facets of enclaves existence political economic and social Rich with maps and illustrations this book covers 282 enclaves with a combined population of approximately 3 million and shows the importance of enclaves because of their specific status and the issues they raise for both the mainland and surrounding states Vinokurov explores for example the fact that Gibraltar played a disproportionately

large role in British Spanish relations throughout the past three centuries Kaliningrad managed to cause a major crisis in EU Russian relations in 2002 2003 tiny Ceuta and Melilla have caused tensions in Spanish Moroccan relations for more than three centuries and have recently become visible as conflict points at the EU level and German Buesingen was subject to several complex international treaties between Germany and Switzerland Rather than viewing each enclave as a unique case or even as an anomaly A Theory of Enclaves provides a systematic investigation of enclave related political and economical issues
