**Global Ecology** Wolfgang Sachs, 1993 Behind the public's hope of effective action by governments on environmental issues lies a complex terrain of conceptual confusion conflicts of interest and philosophical dispute This is why some of the world's leading environmental thinkers have come together in this volume to probe critically the new language being

developed by environmental professionals They examine the contradictions inherent in the fashionable notion of sustainable development They explore the emerging conflicts over the distribution of environmental risks between North and South And they warn that global ecology seen in a managerial perspective may degenerate into an effort to redesign and manage Nature in order to keep economic growth going in the face of a rising tide of resource plunder and pollution This book seeks to launch a critical debate in order to clarify the issues involved and what might constitute appropriate action *Global Ecology* Sven Erik Jørgensen, Brian D. **International Environmental Law and the Global South** Shawkat Alam, Sumudu Atapattu, Carmen G. Gonzalez, Jona Razzaque, 2015-09-17 The unprecedented degradation of the planet's vital ecosystems is among the most pressing issues confronting the international community. Despite the proliferation of legal instruments to combat environmental problems, conflicts between rich and poor nations, the North-South divide, have compromised international environmental law, leading to deadlocks in environmental treaty negotiations and noncompliance with existing agreements. This volume examines both the historical origins of the North-South divide in European colonialism as well as its contemporary manifestations in a range of issues including food justice, energy justice, indigenous rights, trade, investment, extractive industries, human rights, land grabs, hazardous waste, and climate change. Born out of the recognition that global inequality and profligate consumerism present threats to a sustainable planet, this book makes a unique contribution to international environmental law by emphasizing the priorities and perspectives of the global South. *Global Ecology* Sloggett, 1996-03-01
