Reading Women Heidi Brayman Hackel, Catherine E. Kelly, 2011-08-02 In 1500 as many as 99 out of 100 English women may have been illiterate and girls of all social backgrounds were the objects of purposeful efforts to restrict their access to full literacy Three centuries later more than half of all English and Anglo American women could read and the female reader was emerging as a cultural ideal and a market force While scholars have written extensively about women s reading in the nineteenth and twentieth centuries and about women s writing in the early modern period they have not attended sufficiently to the critical transformation that took place as female readers and their reading assumed significant cultural and economic power *Reading Women* brings into conversation the latest scholarship by early modernists and early Americanists on the role of gender in the production and consumption of texts during this expansion of female readership Drawing together historians and literary scholars the essays share a concern with local specificity and material culture Removing women from the historically inaccurate frame of exclusively solitary silent reading the authors collectively return their subjects to the activities that so often coincided with reading shopping sewing talking writing performing and collecting With chapters on samplers storytelling testimony and translation the volume expands notions of reading and literacy and it insists upon a rich and varied narrative that crosses disciplinary boundaries and national borders

The Politics of Inquiry Benjamin Baez, Deron Boyles, 2009-01-09 Winner of the 2010 Critics Choice Award presented by the American Educational Studies Association 2009 CHOICE Outstanding Academic Title In *The Politics of Inquiry* Benjamin Baez and Deron Boyles critique recent trends in education research to argue against the culture of science Using the National Research Council s 2002 report *Scientific Research in Education* as a point of departure they contend that the entire discourse on education science reflects a number of distinct but mutually constitutive political forces or movements that use science and education to shape what we can think and thus what we can become These forces include the attempts to restrict democracy via scientism the uses of academic classifications for organizing the world into social groups the imperatives of the informational society which seek precision in order to convert the world into data for easy governing and the effects of transnational capitalist exchanges which convert everything into a cost benefit analysis and which make us all complicit in ways we do not fully grasp Baez and Boyles examine these forces and offer an alternative to the current pushes to make educational inquiry scientific

Alfred Schutz, Phenomenology, and the Renewal of Interpretive Social Science Besnik Pula,2024-04-16 In recent decades the historical social sciences have moved away from deterministic perspectives and increasingly embraced the interpretive analysis of historical process and social and political change This shift has enriched the field but also led to a deadlock regarding the meaning and status of subjective knowledge Cultural interpretivists struggle to incorporate subjective experience and the body into their understanding of social reality In the early twentieth

century philosopher Alfred Schutz grappled with this very issue Drawing on Edmund Husserl's phenomenology and Max Weber's historical sociology Schutz pioneered the interpretive analysis of social life from an embodied perspective However the recent interpretivist turn influenced by linguistic philosophies discourse theory and poststructuralism has overlooked the insights of Schutz and other phenomenologists This book revisits Schutz's phenomenology and social theory positioning them against contemporary problems in social theory and interpretive social science research The book extends Schutz's key concepts of relevance symbol relations theory of language and lifeworld meaning structures It outlines Schutz's critical approach to the social distribution of knowledge and develops his nascent sociology and political economy of knowledge This book will appeal to readers with interests in social theory phenomenology and the methods of interpretive social science including historical sociology cultural sociology science and technology studies political economy and international relations

Critical theory and social pathology Neal Harris, 2022-11-29 In the neoliberal world of the twenty first century the progressive academy urgently needs a vehicle for normative social research Critical theory once answered this call but today its programme is in crisis The pathologies of recognition approach popular among contemporary critical theorists aids neoliberalism rather than challenging it in part because it is unable to grasp the structural nature of power To offer an alternative this book returns to the work of Erich Fromm and Herbert Marcuse using it as the basis for a revived social theoretical foundation As the first generation of critical theorists knew thought itself can be reified our imaginations debased and our desires artificially induced We need to think beyond recognition and embrace a more potent and aggressive form of social critique true to the founding spirit of the Frankfurt School **The Journal of Social Forces**, 1924
