## **The Recovery Process In Damaged Ecosystems:**

The Recovery Process in Damaged Ecosystems John Cairns,1980      Disturbance and Ecosystems H. A. Mooney,M. Godron,2012-12-06 The earth s landscapes are being increasingly impacted by the activities of man Unfortunately we do not have a full understanding of the consequences of these disturbances on the earth s productive capacity This problem was addressed by a group of French and U S ecologists who are specialists at levels of integration extending from genetics to the biosphere at a meeting at Stanford California sponsored by the National Science Foundation and the Centre National de la Recherche Scientifique With a few important exceptions it was found at this meeting that most man induced disturbances of ecosystems can be viewed as large scale patterns of disturbances that have occurred generally on a small scale in ecosystems through evolutionary time Man has induced dramatic large scale changes in the environment which must be viewed at the biosphere level Acid deposition and CO increase are two 2 examples of the consequences of man s increased utilization of fossil fuels It is a matter of considerable concern that we cannot yet fully predict the ecological consequences of these environmental changes Such problems must be addressed at the international level yet substantive mechanisms to do this are not available      *Strategies for Protection and Management of Floodplain Wetlands and Other Riparian Ecosystems* Raymond Roy Johnson,United States. web the solution s to a quadratic equation can be calculated using the quadratic formula the means we need to do a plus and a minus so there are normally two solutions the blue part  $b^2 - 4ac$  is called the discriminant because it can discriminate between the possible types of answer when it is positive we get two real solutions

web good question the answer to a problem like this is usually written as the square root of the number for example if we had an equation like  $x^2 = 57$  where the square root of 57 would be the value for x then it s normally written  $\sqrt{57}$  use the quadratic formula to solve the equation  $0 = -7q^2 + 2q + 9$  now
