Before mid 1930s health care in America was composed of many approaches There coexisted a diversity of medical schools each addressing a different facet of the healing arts It was in the late 1930s that young Ralph Weiss was trained at the American School of Naturopathy in Manhattan New York under the guidance of Dr Benedict Lust the father of naturopathy Dr Weiss path has crossed many of the pioneers of the naturopathic movement including Kellogg Pfeiffer Shelton Lee Bragg Walker and Howell to mention just a few Among the many patients he worked with was Edgar Cayce the Sleeping Prophet It was he who named Weiss his reluctant healer Whether by accident or fate here is a personal look at a life dedicated to helping others in the gentle art of using nature to heal *Luke: The Gospel of Amazement* Michael Card,2010-12-14 Michael Card embarks on an imaginative journey through the Gospel of Luke Picturing Luke as historian Gentile doctor and slave Card approaches Luke s written account with questions that engage the imagination Join him in the work of opening heart and mind to the Gospel of Amazement **Affliction** Veena Das,2015-01-01 Affliction inaugurates a novel way of understanding the trajectories of health and disease in the context of poverty Focusing on low income neighborhoods in Delhi it stitches together three different sets of issues First it examines the different trajectories of illness What are the circumstances under which illness is absorbed within the normal and when does it exceed the normal putting resources relationships and even one s world into jeopardy A second set of issues involves how different healers understand their own practices The astonishing range of practitioners found in the local markets in the poor neighborhoods of Delhi shows how the magical and the technical are knotted together in the therapeutic experience of healers and patients The book asks What is expert knowledge What is it that the practitioner knows and what does the patient know How are these different forms of knowledge brought together in the clinical encounter broadly defined How does this event of everyday life bear the traces of larger policies at the national and global levels Finally the book interrogates the models of disease prevalence and global programming that emphasize surveillance over care and deflect attention away from the specificities of local worlds Yet the analysis offered retains an openness to different ways of conceptualizing what is happening and stimulates a conversation between different disciplinary orientations to health disease and poverty Most studies of health and disease focus on the encounter between patient and practitioner within the space of the clinic This book instead privileges the networks of relations institutions and knowledge over which the experience of illness is dispersed Instead of thinking of illness as an event set apart from everyday life it shows the texture of everyday life the political economy of neighborhoods as well as the dark side of care It helps us see how illness is bound by the contexts in which it occurs while also showing how illness transcends these contexts to say something about the nature of everyday life and the making of subjects The Reluctant Healer D.
