The Years Of The Forest:

YEARS OF THE FOREST Helen Hoover, 2013-08-28 This is a book that takes us inside the Hoovers wilderness home during those sixteen Years of the Forest and lets us experience not only the joys and the techniques but also the challenges and travails of going it alone in the beautiful but not always accommodating wilderness far from the technology and services that city people take for granted It is a book of wilderness adventure it is an education in the ingenuities of wilderness housekeeping filled with practical details about making do building and rebuilding gardening for fun and for food even advice about getting away from getting away from it all Good times and Hard times good neighbors and bad neighbors the strains engendered by conflicting views and passions about the use of the environment Mrs Hoover shares her experience without stint But above all over under and all around her straightforward and practical approach to life in the wilderness there is as always the sensitive and moving awareness of nature especially of the animals with whom she and her husband shared the forest often helping them through starving winters that is the special quality of her writing and her life **The Years of the Forest** ,1973 **Forest Fire Laboratory at Riverside and Fire Research in California** Carl C. Wilson, James Bernard Davis, 1988 The need for protection from uncontrolled fire in California was identified by Abbott Kinney Chairman of the State Board of Forestry more than 75 years before the construction of the Riverside Forest Fire Laboratory With the organization of the USDA Forest Service the need for an effective fire protection organization became apparent In response a somewhat fragmented research program got under way in the 19 10 s Although the research was successful in reducing fire damage under most conditions severe fire years still made it clear that a strong cohesive fire research effort headquartered at an adequate laboratory was necessary However the Fire Laboratory did not just happen It was the result of considerable organized public and private support During the 50 years prior to the dedication of the Laboratory and the 25 years since there has been an effort to balance a pragmatic approach toward dealing directly with the fire manager and also maintaining scientific excellence There are currently six research projects at the Laboratory with emphases on fire management and the beneficial use of fire forest recreation effects of air pollution on forest ecosystem and watershed management Annual Report of the Michigan Forestry Commission for the Year ...
