The Poetics of Stage Space Bruce A. Bergner, 2013-05-11 This book analyzes theatre scene design through the powers and characteristics of physical space Physical space is central to creative composition in the theatre but the author extends the reach of the book to individuals concerned with spatial design architects interior designers industrial designers artists and other performers A theory is presented on how design and its creative process echo the process of human awareness and action The book covers an array of considerations for the theatre designer the observable features of given physical spaces their layout detailing and atmosphere and presents these features from the points of view of various disciplines There are chapters on the physics of space the geography of space and the music of space The author also speaks to the less tangible qualities sensed more personally such as the spirituality or the psyche of space A discussion of the collaborative process of creating space is included Instructors considering this book for use in a course may request an examination copy here [Performance and the Politics of Space](#)

Erika Fischer-Lichte, Benjamin Wihstutz, 2013 From its very beginnings theatre has been both an art and a public space shared by actors and spectators As a result its entity and history is intimately tied to politics a politics of inclusion and exclusion of distributions and placements of spatial appropriation and utopian concepts This collection examines what is at stake when a theatrical space is created and when a performance takes place it asks under what circumstances the topology of theatre becomes political The book approaches this issue from various angles taking theatre as a cultural paradigm for political dimensions of space in its respective historical context Visiting the political dimensions of theatrical space in both theatre history and contemporary performance the volume responds to the so called spatial turn in cultural and historical studies and questions a politics of aesthetics that is discussed in continental philosophy The book visits different levels and linkages between aesthetic theory and geography art and sociology architecture and political theory and geometry and history shedding new light on theatre politics and space thereby transforming this historically intertwined triad into a transdisciplinary theme Provided by publisher [The Drama](#), 1914
