*Ourselves Alone* Janet Nolan,1986      *Man Confronts Himself Alone* Zohar Mihaely,2024-10-21 In 1957 the Russians launched the first satellite into space marking the first time a man made object broke through nature s limitations In her iconic book *The Human Condition* Hannah Arendt made the attempt to figure out the political implications of that seeming achievement Her conclusion is that the astonishing scientific achievement of unprecedented control over terrestrial nature through the adoption of an outside the world universal perspective has shaped a prevailing mentality that sees the world in which we have felt at home throughout history as only optional This has resulted in socioeconomic and political changes throughout modernity ultimately reducing human ability to act politically Many people today feel comfortable in a world shaped by science and technology But Arendt warns us that there is hope for modern society if we can envision ways to make our active life worldly again Mihaely s examination of Arendt s thoughts on science and politics stimulates the reader to rethink the authenticity of their freedom today
