Theoretical Analyses On Romance Language:

Theoretical Analyses on Romance Languages José Lema, Esthela Treviño, 1998-01-01 From the papers presented at the 26th LSRL this volume offers a selection of contributions on phonological issues and on syntax. Most of the grammatical phenomena discussed are treated within the frameworks of the Minimalist Program, Distributed Morphology or Optimality Theory. It was apparent from the diversity of the papers delivered that these approaches are exposing novel phenomena which enrich and widen our knowledge and understanding of language. The analyses undertaken in these articles range over a variety of dialects of Romance languages.

Theoretical Analyses in Romance Linguistics Christiane Laeufer, Terrell A. Morgan, 1991-01-01 This nineteenth edition of LSRL proceedings contains a selection of papers on a variety of Romance idioms and includes current topics in established areas of study. The phonology papers focus mostly on syllabic and higher level prosodic structure. The morphology section deals primarily with compounding. The syntax contributions principally treat infinitival clauses, extraction phenomena and binding. While synchronic data serve as the point of departure in most of the studies, historical perspectives are also considered in each major section. Included in the volume are two invited contributions by Violeta Demonte on linking and case with prepositional verbs and Shana Poplack on variation in the form and function of the subjunctive in Canadian French.

Contributions of Romance Languages to Current Linguistic Theory Deborah L. Arteaga, 2019-03-18 This volume presents novel analyses of morphosyntax and phonology by well known scholars in their respective fields. The book offers chapters on a range of Romance languages and dialects including Canadian French, Standard French, Modern French, Sardinian, Sicilian and Spanish. Other chapters focus on diachronic topics on French and Italian. The volume will be of interest to researchers looking for current research in linguistics on the Romance languages. It will also serve as a reference volume or supplemental reading for graduate students and advanced undergraduate students in linguistics.
