multimodal fictional texts against the background of cutting edge research refuting a definition based on the binary of fiction and non fiction Translating the insights gained from this discussion to the language education context learners are conceptualised as active designers of meaning making when engaged with eco documentaries Based on this discussion the book puts forth an innovative multiliteracies informed concept which is embedded in a sustainability oriented pedagogy of hope which encourages learners to learn and practice languages of hope and advocacy The book will be of interest to scholars in the fields of ecopedagogy sustainability education global citizenship education and cultural learning film pedagogy and language education as well as language educators
