Utopias Garden:

Utopia's Garden E. C. Spary, 2000-12-01 The royal Parisian botanical garden the Jardin du Roi was a jewel in the crown of the French Old Regime praised by both rulers and scientific practitioners Yet unlike many such institutions the Jardin not only survived the French Revolution but by 1800 had become the world's leading public establishment of natural history the Muséum d'Histoire Naturelle E C Spary traces the scientific administrative and political strategies that enabled the foundation of the Muséum arguing that agriculture and animal breeding rank alongside classification and collections in explaining why natural history was important for French rulers But the Muséum's success was also a consequence of its employees Revolutionary rhetoric by displaying the natural order they suggested the institution could assist in fashioning a self educating self policing Republican people Natural history was presented as an indispensable source of national prosperity and individual virtue Spary's fascinating account opens a new chapter in the history of France science and the Enlightenment

The Garden, 1926 Utopia(s) - Worlds and Frontiers of the Imaginary Maria Rosário Monteiro, Mário Ming Kong, Maria João Pereira Neto, 2016-11-03 The idea of Utopia springs from a natural desire of transformation of evolution pertaining to humankind and therefore one can find expressions of utopian desire in every civilization Having to do explicitly with human condition Utopia accompanies closely cultural evolution almost as a symbiotic organism Maintaining its roots deeply attached to ancient myths utopian expression followed and sometimes preceded cultural transformation

Through the next almost five hundred pages virtually one for each year since Utopia was published researchers in the fields of Architecture and Urbanism Arts and Humanities present the results of their studies within the different areas of expertise under the umbrella of Utopia Past present and future come together in one book They do not offer their readers any golden key Many questions will remain unanswered as they should The texts presented in Proportion Harmonies and Identities UTOPIA S WORLDS AND FRONTIERS OF THE IMAGINARY were compiled with the intent to establish a platform for the presentation interaction and dissemination of researches It aims also to foster the awareness and discussion on the topics of Harmony and Proportion with a focus on different utopian visions and readings relevant to the arts sciences and humanities and their importance and benefits for the community at large

Victorian Visions of Suburban Utopia Nathaniel Robert Walker,2020-11-17 The rise of suburbs and disinvestment from cities have been defining features of life in many countries over the course of the twentieth century In Victorian Visions of Suburban Utopia Nathaniel Walker asks why did we abandon our dense complex urban places and seek to find the best of the city and the country in the flowery suburbs While looking back at the architecture and urban design of the 1800s offers some answers Walker argues that a great missing piece of the story can be found in Victorian utopian literature The replacement of cities with high tech suburbs was repeatedly imagined and breathlessly described in the socialist dreams and science fiction fantasies of dozens of British and American authors Some of these visionaries such as Robert Owen Edward Bulwer Lytton Edward Bellamy William Morris Ebenezer Howard and H G Wells are enduringly famous while others were street vendors or amateur chemists who have been all but forgotten Together they fashioned strange and beautiful imaginary worlds built of synthetic gemstones lacy metal colonnades and unbreakable glass staffed by robotic servants and teeming with flying carriages As varied as their futuristic visions could be Walker reveals how most of them were unified by a single desperate plea for humanity to have a future worth living we must abandon our smoky poor chaotic Babylonian cities for a life in shimmering gardens

Gardens, Knowledge and the Sciences in the Early Modern Period Hubertus Fischer,Volker R. Remmert,Joachim Wolschke-Bulmahn,2016-06-03 This volume focuses on the outstanding contributions made by botany and the mathematical sciences to the genesis and development of early modern garden art and garden culture The many facets of the mathematical sciences and botany point to the increasingly scientific approach that was being adopted in and applied to garden art and garden culture in the early modern period This development was deeply embedded in the philosophical religious political cultural and social contexts running parallel to the beginning of processes of scientization so characteristic for modern European history This volume strikingly shows how these various developments are intertwined in gardens for various purposes
