**Come as You R(NA): Post-transcriptional Regulation Will Do the Rest** Oriane Mauger, Michael A. Kiebler, Clémence Bernard, 2025-08-27 Recent studies have highlighted the discrepancy between transcriptional regulation and protein levels in the brain thus placing post transcriptional mechanisms at the center of neuronal function RNA molecules are highly versatile and regulated at multiple stages of their lifecycle This significantly affects both coding and non coding transcript sequences asymmetric RNA localization in specific compartments RNA stability and resulting protein production We are beginning to understand the many RNA regulatory pathways in progenitors developing and mature neurons and their links with neurological disorders It all starts in the nucleus with RNA processing regulation intimately coupled with transcription For instance alternative processing such as microexon inclusion cryptic exons intron retention or back splicing reactions and resulting circular RNAs impacts the spatio temporal dynamics of transcripts and amplifies the proteome In the cytoplasm an increasing number of pathways are now identified to control translation such as the phase transition of ribonucleoprotein condensates to fine tune protein production in particular at specific synapses Advances in omics technologies have massively accelerated our strive to understand the many contributions of post transcriptional mechanisms in the central nervous system This has highlighted the specificity of these processes at different developmental stages in different cell and synapse types in response to different stimuli and their substantial alterations in neurodevelopmental and neurodegenerative disorders Many of these post transcriptional regulatory steps are well conserved throughout evolution Others have emerged exclusively in primates supporting the compelling hypothesis that post transcriptional mechanisms could play a pivotal role in species evolution This now paves the way to investigate their functional relevance for neuronal circuits and higher cognitive functions The revolution of CRISPR and the thorough manipulation of gene sub sequences without interfering with global gene expression provides a means to directly address the role of post transcriptional events on neuron development and plasticity We anticipate that a better understanding of the underlying principles of these mechanisms will provide unprecedented insight into various brain functions This Research Topic aims to highlight the recent progress on post transcriptional processes involved in the development function and plasticity of brain cells We welcome Perspective and Review Articles Themes to be addressed in this Topic include but are not limited to diverse forms of RNA processing e g alternative splicing RNA editing chemical modifications and their functional relevance roles of non coding RNAs e g microRNAs long non coding RNAs circular RNAs mechanisms of RNA export transport and localization mRNA translational control and its local regulation in specific subcellular compartments ribonucleoprotein condensates for translational control technical challenges for single cell and single synapse characterization of post transcriptional programs post transcriptional regulation across species

**Seven Things The Holy Spirit Will Do For You** Chris Oyakhilome, Christ Embassy Int'l, 2005  
The greatest thing that God has done for us is to give us the Holy Spirit The Holy Spirit is the Almighty Spirit of God He s the

One Who communicates the presence of God So many Christians have never really known the importance of that That s what made Jesus the Christ It was the Spirit s indwelling that made Him who He was That s the Spirit that makes us children of God today The Holy Spirit is the Third Person of the Trinity revealed to the Christian He is one with the Father and the Son 1 John 5 7 He is neither less important nor less powerful He is God and co equal with the Father and the Son Right from the beginning of the Scriptures we re introduced to the Person of the Holy Spirit and throughout the Scriptures we re further acquainted with Him His power and His Person In all of these His ministry is clearly revealed not to exalt Himself but to lead us and reveal to us the Person of Jesus Ephesians 5 18 And be not drunk with wine wherein is excess but be filled with the Spirit The ministry of the Holy Spirit in the life of the Christian is so vital This is why Paul by the Spirit gave us this all important charge to continually be filled with the Holy Spirit He also prayed concerning the communion of the Holy Ghost in 2 Corinthians 13 14 The grace of the Lord Jesus Christ and the love of God and the communion of the Holy Ghost be with you all Amen This is talking about a relationship a fellowship with the Holy Spirit for He is a person and you can maintain a relationship with Him You can talk to Him and commune with Him A lot of us have missed out on the blessings of such a communion because we ve not taken time to understand the Holy Spirit But when you know the Holy Spirit and recognize the importance of communing with Him you ll constantly desire to have the fullness of the Spirit and then you will experience the blessings of that wonderful fellowship In this book I have highlighted seven vital blessings that the Holy Spirit brings into the life of every child of God who has allowed Him to fill them and occupy their vessels seven blessings that will bring an amazing transformation in your life as you yield to the influence of the Holy Spirit
