America the relation of literary style to gender became of increasing interest as women writers became ever more prominent In the influential magazines of the late nineteenth century Harper s Century Scribner s Atlantic Monthly Cosmopolitan and Ladies Home Journal writers directly or implicitly reflected society s views of the sexes and the proper roles of men and women In this intelligent and accessible book the author examines how William Dean Howells Henry James Edith Wharton and Willa Cather helped both to perpetuate and to subvert Victorian America s ideology of language and gender All had fruitful careers as novelists editors and critics and she demonstrates that each was in a unique position to affect popular language and gender stereotypes To gauge their responses to the pervasive assumptions held by the magazines that published them Nettels traces how these writers defined masculine and feminine in their works how they characterized women s speech and language how they distinguished male and female discourse and where they invested authority in matters of usage Taking into account others engaged in the Victorian construction of gender such as grammarians linguists sociologists and writers on etiquette Nettels offers a compelling look at the cultural perpetuation of ideologies as well as fascinating scholarship on four authors who manipulated social mores to establish their place in American literature
