Information Systems Development Paul Beynon-Davies,1989 *Modula-2 Applied* R. J. Mitchell,1991 Programming is a skill requiring knowledge of both the basic constructs of computer languages and the techniques employing these constructs How these are used in any application is often determined by experience of existing programs This book provides such experience by describing the techniques and implementing them in one useful program an advanced drawing package The book also shows the development of a large program The program is implemented using TopSpeed Modula 2 running on IBM PCs and compatibles Modula 2 is ideally suited for the task A knowledge of the language is assumed The program including its source is available on disk
