J. McLemore, 2020-09-12 Throughout *Circle Square* T J McLemore renders the language of physics and theoretical science into poetry to illuminate the mysterious ways we experience reality Exploring the complex and at times dense world of scientific language McLemore spins into verse the kind of material many poets might shy away from Throughout the chapbook the poet begins from theoretical physics and other realms of science to continue poetry's endless search to define explore and represent the world truthfully through deep attention to language and form Neutrinos string theory thermodynamics and quantum entanglement become meditations and tools for self examination as McLemore finds new ways to revel in and represent physical existence Drawing from highly technical scientific materials McLemore has crafted poems that are thoughtful grounding and expressively charged leading readers through divine moments of wonder and contemplation
