the white swing voter head on Steve Phillips named one of America's Top 50 Influencers by Campaigns Elections closely examines 2016 election results against a long backdrop of shifts in the electoral map over the past generation arguing that now more than ever hope for a more progressive political future lies not with increased advertising to middle of the road white voters but with cultivating America's growing diverse majority Emerging as a respected and clear headed commentator on American politics at a time of pessimism and confusion among Democrats Phillips offers a stirring answer to anyone who thinks the immediate future holds nothing but Trump and Republican majorities

*Fertility and Faith* Philip Jenkins, 2020 Demography drives religious change High fertility societies like most of contemporary Africa tend to be fervent and devout The lower a population's fertility rates the greater the tendency for people to detach from organized or institutional religion Thus fertility rates supply an effective gauge of secularization trends In *Fertility and Faith* Philip Jenkins maps the demographic revolution that has taken hold of many countries around the globe in recent decades and explores the implications for the future development of the world's religions Demographic change has driven the secularization of contemporary Western Europe where the revolution began Jenkins shows how the European trajectory of rapid declines in fertility is now affecting much of the globe The implications are clear the religious character of many non European areas is highly likely to move in the direction of sweeping secularization And this is now reshaping the United States itself This demographic revolution is reshaping Christianity Buddhism Islam Hinduism and Judaism In order to accommodate the new social trends these religions must adapt to situations where large families are no longer the norm Each religious tradition will develop distinctive emphases concerning morality gender and sexuality as well as the roles of clergy and laity in the faith's institutional structures Radical change follows great upheaval The tidal shift is well underway With *Fertility and Faith* Philip Jenkins describes this ongoing phenomenon and envisions our collective

religious future     The Past is a Future Country Edward Dutton,J.O.A. Rayner-Hilles,2022-06-30 Since the 1960s the West has moved ever leftwards Equality and feelings are central to the New Religion that rejects all traditional values Yet beneath the institutionally dominant Left stews a growing and restless Right How has this fractured situation come about What will the future hold In The Past is a Future Country the authors trace it back to the Industrial Revolution Darwinian selection massively weakened meaning that for the first time in history the selfish sick and stupid could survive and reproduce undermining our religious group oriented culture Now the West is scourged by an epidemic of narcissists competing to signal their individuality and moral superiority But their fight for equality is really a fight for self promotion Reflecting this runaway individualism Westerners increasingly don t have children save for those who are genetically resistant to this onslaught the staunchly conservative and religious the eventual inheritors of the earth But there is a dark storm brewing in the demographic data that the authors have analysed There is a burgeoning growth in the population of exceptionally unintelligent and antisocial people that social welfare systems cannot sustain for much longer The developed world will pass away and the global population that depends on it will crash in the greatest Malthusian Collapse of all time Yet all is not lost The authors show how a resistant class of intelligent religious conservatives will band together to preserve enclaves of civilization that may survive most of the coming apocalypse and from its ashes rebuild a new world A Neo Byzantium

Demographic Dividend David Bloom, David Canning, Jaypee Sevilla, 2003-02-13 There is long standing debate on how population growth affects national economies A new report from Population Matters examines the history of this debate and synthesizes current research on the topic The authors led by Harvard economist David Bloom conclude that population age structure more than size or growth per se affects economic development and that reducing high fertility can create opportunities for economic growth if the right kinds of educational health and labor market policies are in place The report also examines specific regions of the world and how their differing policy environments have affected the relationship between population change and economic development
