**Twenty-First Century** Claudia Sunna, Davide Gualerzi, 2015-12-14 Development Economics has been identified as a  
homogeneous body of theory since the 1950s concerned both with the study of development issues and with the shaping of  
more effective policies for less advanced economies Development Economics in the Twenty First Century brings together an  
international contributor team in order to explore the origins and evolution of development economics This book highlights  
the different elements of high development theory through a precise reconstruction of the different theoretical approaches  
that developed between the 1950s and the 1970s These include the theory of balanced and unbalanced growth theory the  
debate on international trade the concept of dualism dependency theory structuralism and the analysis of poverty and  
institutions The chapters highlight the relevance and usefulness of these analyses for the contemporary theoretical debate on  
development issues Comparative perspectives are explored and analysed including those of Keynes Hirschman Krugman and  
Stiglitz The chapters situate development economics within current debates among economists and historians of economic  
thought providing a platform for future research This book is suitable for researchers and students with an interest in
