The Rhetoric Of Science

**John S. Nelson, Allan Megill, Deirdre N.
McCloskey**

The Rhetoric Of Science:

The Rhetoric of Science Alan G. Gross,1990 Alan Gross applies the principles of rhetoric to the interpretation of classical and contemporary scientific texts to show how they persuade both author and audience This invigorating consideration of the ways in which scientists from Copernicus to Darwin to Newton to James Watson establish authority and convince one another and us of the truth they describe may very well lead to a remodeling of our understanding of science and its place in society

Starring the Text Alan G. Gross,2006 Starring the Text The Place of Rhetoric in Science Studies firmly establishes the rhetorical analysis of science as a respected field of study Alan G Gross one of rhetoric s foremost authorities summarizes the state of the field and demonstrates the role of rhetorical analysis in the sciences He documents the limits of such analyses with examples from biology and physics explores their range of application and sheds light on the tangled relationships between science and society In this deep revision of his important Rhetoric of Science Gross examines how rhetorical analyses have a wide range of application effectively exploring the generation spread certification and closure that characterize scientific knowledge Gross anchors his position in philosophical rather than in rhetorical arguments and maintains there is rhetorical criticism from which the sciences cannot be excluded Gross employs a variety of case studies and examples to assess the limits of the rhetorical analysis of science For example in examining avian taxonomy he demonstrates that both taxonomical and evolutionary species are the product of rhetorical interactions A review of Newton s two formulations of optical research illustrates that their only significant difference is rhetorical a difference in patterns of style arrangement and argument Gross also explores the range of rhetorical analysis in his consideration of the evolution of evolution of Darwin s notebooks In his analysis of science and society he explains the limits of citizen action in executive judicial and legislative democratic realms in the struggle to prevent ameliorate and provide adequate compensation for occupational disease By using philosophical historical and psychological perspectives Gross concludes rhetorical analysis can also supplement other viewpoints in resolving intellectual problems Starring the Text which includes fourteen illustrations is an updated readable study geared to rhetoricians historians philosophers and sociologists interested in science The volume effectively demonstrates that the rhetoric of science is a natural extension of rhetorical theory and criticism

Rhetoric in the Rhetoric of Science ,1993 **Rhetoric of Science** Lawrence J. Prelli,1994 **Rational Rhetoric** David J. Tietge,2008-07-09 David J Tietge examines the place and influence of scientific discourse in the popular consciousness of contemporary American society offering critical strategies for recognizing decoding and understanding scientific language as it is used by both scientific and a scientific agents and agencies The Rhetoric of Science ,1963 **Symposium on the Rhetoric of Science** International Society for the History of Rhetoric. Meeting,1989 **Composition and the Rhetoric of Science** Michael J Zerbe,2007-03-21 Composition and the Rhetoric of Science Engaging the Dominant Discourse calls for instructors of first year writing courses to employ primary scientific discourse in their teaching and for rhetoricians of

science to think about teaching scientific discourse as a literacy skill Author Michael J Zerbe argues that inclusion of scientific discourse is crucial because of this rhetoric's status as the dominant discourse in western culture The volume draws on Lyotard i ek Foucault and Althusser to argue that while important theorists such as these have recognized the dominance of scientific discourse rhetoric and composition has not to its detriment The text illustrates that scientific discourse remains a miniscule part of the enterprise of rhetoric and composition and thus the field is not fulfilling its mission of providing students with the writing and reading skills they need to live and work in a science and technology dependent society Zerbe provides an analysis of science popularizations and demonstrates how these works can be used to contextualize primary scientific research He also presents three pedagogical scenarios each built around a carefully chosen accessible example of scientific discourse that demonstrate how articles from scientific journals can be used in writing courses Only by gaining a meaningful fluency in this discourse one that is not offered by science textbooks can a more sophisticated scientific literacy be assured Composition and the Rhetoric of Science effectively explores the relatively limited amount of work done in rhetoric and composition on scientific discourse and questions this state of affairs Zerbe presents for the first time cultural studies and science literacy as gateways for incorporating scientific discourse into first year writing courses

Technical Communication Quarterly Alan G. Gross, Laura J. Gurak, 2005-06 The ubiquity of the Internet and digital technology has changed the sites of rhetorical discourse and inquiry as well as the methods by which such analyses are performed This special issue discusses the state of rhetoric of science and technology at the beginning of the twenty first century While many books connecting rhetorical theory to the Internet have paved the way for more refined and insightful studies of online communication the articles here serve as a reflective moment an opportunity to consider thoughtful statements from those who have published and been influential in the field

Science Reason Rhetoric Henry Krips, J.E. McGuire, Trevor Melia, 2017-03-13 This volume from the Pittsburgh Konstanz series marks a unique collaboration by internationally distinguished scholars in the history rhetoric philosophy and sociology of science Converging on the central issues of rhetoric of science the essays focus on figures such as Galileo Harvey Darwin von Neumann and on issues such as the debate over cold fusion or the continental drift controversy Their vitality attests to the burgeoning interest in the rhetoric of science

Cosmos and the Rhetoric of Popular Science Karen Schroeder Sorensen, 2017-06-27 Carl Sagan's Cosmos inspires audiences to look at the universe with new eyes and to appreciate humanity's importance in it Sagan's deft use of rhetorical strategy creates an experience that pushes beyond the limits of a mere educational program to reveal a mythic adventure Although Sagan contributed much to the field of science as well as to public understanding of it Cosmos remains his signature brand Cosmos and the Rhetoric of Popular Science builds on Thomas M Lessl's observations regarding Cosmos connection to the mythic and science fiction It delves deeply into Sagan's rhetorical construction of the program in order to understand what elements contributed to its mythos

The Rhetoric of Science David Hatfield, 1992 The SAGE

Handbook of Rhetorical Studies Andrea A. Lunsford, Kirt H. Wilson, Rosa A. Eberly, 2008-10-29 The SAGE Handbook of Rhetorical Studies surveys the latest advances in rhetorical scholarship synthesizing theories and practices across major areas of study in the field and pointing the way for future studies Edited by Andrea A Lunsford and Associate Editors Kirt H Wilson and Rosa A Eberly the Handbook aims to introduce a new generation of students to rhetorical study and provide a deeply informed and ready resource for scholars currently working in the field **The Rhetoric of the Human Sciences**

John S. Nelson, Allan Megill, Deirdre N. McCloskey, 1987 Opening with an overview of the renewal of interest in rhetoric for inquiries of all kinds this volume addresses rhetoric in individual disciplines mathematics anthropology psychology economics sociology political science and history Drawing from recent literary theory it suggests the contribution of the humanities to the rhetoric of inquiry and explores communications beyond the academy particularly in women's issues religion and law The final essays speak from the field of communication studies where the study of rhetoric usually makes its home **Useful and Entertaining** Mickey Marsee, 1996 The Rhetoric of Science in England of the Mid-seventeenth Century Richard Foster Jones, 19?? **On the Frontier of Science** Leah Ceccarelli, 2013-11-01

The frontier of science is a metaphor that has become ubiquitous in American rhetoric from its first appearance in the public address of early twentieth century American intellectuals and politicians who aligned a mythic national identity with scientific research to its more recent use in scientists' arguments in favor of increased research funding Here Leah Ceccarelli explores what is selected and what is deflected when this metaphor is deployed its effects on those who use it and what rhetorical moves are made by those who try to counter its appeal In her research Ceccarelli discovers that the frontier of science evokes a scientist who is typically male a risk taker an adventurous loner someone separated from a public that both envies and distrusts him with a manifest destiny to penetrate the unknown It conjures a competitive desire to claim the riches of a new territory before others can do the same Closely reading the public address of scientists and politicians and the reception of their audiences this book shows how the frontier of science metaphor constrains American speakers helping to guide the ends of scientific research in particular ways and sometimes blocking scientists from attaining the very goals they set out to achieve

Science and the Internet Alan Gross, Jonathan Buehl, 2016-12-05 The essays in *Science and the Internet* address the timely topic of how digital tools are shaping science communication Featuring chapters by leading scholars of the rhetoric of science and technology the volume fills a much needed gap in contemporary rhetoric of science scholarship Overall the essays reveal how digital technologies may both fray the boundaries between experts and non experts and enable more collaborative democratic means of public engagement with science Lisa Ker nen PhD Associate Professor and Director of Graduate Studies Department of Communication University of Colorado Denver *Persuasive Functions of Science-fiction* Ray Lynn Anderson, 1969 *Shaping Science with Rhetoric* Leah Ceccarelli, 2010-11-15 How do scientists persuade colleagues from diverse fields to cross the disciplinary divide risking their careers in new interdisciplinary research programs

Why do some attempts to inspire such research win widespread acclaim and support while others do not? In *Shaping Science with Rhetoric*, Leah Ceccarelli addresses such questions through close readings of three scientific monographs in their historical contexts: Theodosius Dobzhansky's *Genetics and the Origin of Species* (1937) which inspired the modern synthesis of evolutionary biology; Erwin Schrödinger's *What Is Life?* (1944) which catalyzed the field of molecular biology; and Edward O. Wilson's *Consilience* (1998) a so far not entirely successful attempt to unite the social and biological sciences. She examines the rhetorical strategies used in each book and evaluates which worked best based on the reviews and scientific papers that followed in their wake. Ceccarelli's work will be important for anyone interested in how interdisciplinary fields are formed from historians and rhetoricians of science to scientists themselves.
