Theatre Practice Stark Young, 1926 This volume undertakes to consider not dramatists and plays alone but rather the arts of acting too of theatrical design and production and such special phases and problems of these as illusion stage movement tempo realistic and poetic methods the voice music color and lights and furthermore such artists designers producers directors and playwrights as illustrate and embody the principles considered The very subjects undertaken then are not common to books on the drama and deal with points and problems that are often felt but only vaguely shadowed in the minds of students and lovers of the theatre and even of its creative artists By such subjects the author at least intends to dilate the scope of the discussion and to illuminate a little further perhaps the essential nature of the art of the theatre
