Adamson, 2007-11-06 Adamson leads his readers through intricate debates with care and skill Even the non specialist reader will come away with an understanding of the stakes in modernist studies Mary Gluck author of Popular Bohemia Modernism and Urban Culture in Nineteenth Century Paris No serious student of the European avant garde in the early twentieth century will be able to overlook this subtle and impassioned attempt to rethink its history its far reaching ambitions and its strategies for achieving them its successes and its failures Because of Adamson s distinctive perspective and the breadth of his research I persistently found myself being forced to rethink the history of the European avant garde and question some of my own assumptions and conclusions Robert Wohl author of The Spectacle of Flight Aviation and the Western Imagination 1920 1950 **Theo Van Doesburg** Evert van Straaten, Theo van Doesburg, 1994 *Theo Van Doesburg* Palais des beaux-arts (Bruxelles, Belgique)., 2016 R sum en 4 me de couverture After the First World War the European avant gardes longed for change and hoped for a better future More than any other artist Theo van Doesburg 1883 1931 took part in this reconstruction effort by broadening Piet Mondrian s Neoplastic aesthetic to all disciplines painting sculpture architecture and the applied arts Theo van Doesburg proposed a genuine revolution that sought to transform the world in every way to create a new kind of artistic expression wich would

interact not only with life in all its complexity but also with scientific and technological developments His constantly changing approach brought together apparently incompatible innovation as demonstrated by this move toward Elementarism and then to Art Concret To champion his project on the international stage Van Doesburg who was also the founder of the De Stijl movement and its magazine succeeded in bringing together all the leading artists He is recognized as much for his visual achievements as for his means of accomplishing a philosophical artistic and collective ideal Many artists including Mondrian would largely owe their international renown to Theo van Doesburg

Van Doesburg & the International Avant-Garde Marc Dachy, 2009 Dutch artist Theo Van Doesburg 1883-1931 is perhaps best known as a prime mover in De Stijl the Dutch artistic movement that demanded an elemental abstract vocabulary in both Painting and Architecture Here revealed for the first time is the true extent of his involvement with Dada and Constructivist artists groups spread across the whole of Europe as far as Russia and beyond and the breadth of his creative practice in fields as diverse as Film Typography Graphic Design and Music A man of multiple talents and identities he was inspired by the catastrophe of the First World War to attempt nothing less than the reshaping of culture in its entirety and the construction of a new world

The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition Linda Dalrymple Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to

2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak **Theo Van Doesburg** Joost Baljeu,1974 **The Struggle for Utopia** Victor Margolin,1997 Focusing on the difficult relationship between art and social change Margolin brings important new insights to our understanding of the avant garde s role in a period of great political complexity *Theo Van Doesburg* Theo van Doesburg,1947
