Dionysian Erman Kaplama, 2013-12-12 Erman Kaplama explores the principle of transition bergang from metaphysics to physics developed by Kant in his unfinished magnum opus Opus Postumum Drawing on the Heraclitean logos and Kant's notions of sense intuition Anschauung and reflective judgment Kaplama interprets transition as an aesthetic principle He revises the idea of nature phusis as the principle of motion referring to Heraclitus cosmology as well as Heidegger's and Nietzsche's lectures on the pre-Socratics Kaplama compares the Kantian sublime and Nietzschean Dionysian as aesthetic theories representing the transition from the sensible to supersensible and as cosmological theories that consider human nature ethos as an extension of nature In light of such Nietzschean notions as the eternal recurrence and will to power the Dionysian is shown to trigger the transition by which nature and art are redefined Finally Cosmological Aesthetics employs the principles of transition and motion to analyze Van Gogh's Starry Night in an excursus **Science at the Edge** John
