Colwel,2023-11-16 Over 3 million years ago our ancestors realised that rocks could be broken apart for sharp edges to cut and slice meat The discovery made for a good meal It also changed the fate of our species and our planet In this lively and learned book Chip Colwell charts three great leaps in humankind s relationship with objects and belongings from the discovery of tools to the production of endless commodities How did we start out as primates who needed nothing and end up as people who need everything With colourful characters astonishing archaeological discoveries and reflections from philosophy and culture Colwell s quest for answers takes readers to places both spectacular and strange the Italian cave featuring the world s first painted art a Hong Kong skyscraper where a priestess channels the gods a mountain of trash whose height rivals Big Ben or the Statue of Liberty Humans make stuff but our stuff makes us human and our love affair with things may be our downfall With landfills brimming and oceans drowning in plastic now is the time for a fourth and final leap for humanity to reevaluate our relationship to the things that make and could break our world Roadmap for Global

Sustainability — Rise of the Green Communities Salah El-Haggag,Aliaa Samaha,2019-05-08 Progressive increases in consumer demands along with aggressive industrial consumption led the world to proximate resource depletion weather changes soil and air degradation and water quality deterioration We now know that the paradigm of production at the expense of human condition is not sustainable This book briefly explains how we reached this situation and offers suggestions as to what can be done to overcome it It invites the best entrepreneurial talent and scientific and technological

know how to develop a sustainable economy around sustainable communities services and sectors A major obstacle previously identified by involved parties was the ability of accommodating for the emerging economic growth without causing harm to the environment especially with resource depletion This book provides the solution by creating a need to bring on a new revolution that preserves the rights of next generations to live in a healthy environment This Sustainability Revolution requires the integration of economic environmental and social factor as well as the practical aspects of implementing sustainability through green activities which are discussed throughout the book In this book a globalization is proposed that encourages creativity and innovation towards sustainability With this global sustainability approach real globalization both rich and poor will benefit from the global sustainability approach This will close the gap between rich and poor Developing countries could reap the benefit of current technology without undergoing many of the growing pains associated with development of these technologies Governments are able to better work together towards common goals now that there is an advantage in cooperation an improved ability to interact and coordinate and a global awareness of issues The book presents a sustainability roadmap to bring together various concepts that have been dealt with independently by previous authors and link them to establish the fundamental practical steps The flow path and the direction for successful implementation of a sustainability roadmap are also discussed in detail in the book For the first time the authors use sustainable communities to create a better quality of life for residents while minimizing the use of the resources to meet current needs and ensure adequate resources for future generations These green communities create new industries for the local economy and improve public health which offers more hope for their citizens Sustainable transportation renewable energy recycling clean water and urban forests help to make a more livable community and help to control the global climate change They involve all citizens and incorporate local values into decision making Sustainable Living in Small Spaces Barrett
