The initial chapter calibrates the reader's understanding and significance of science. The next chapters describe how climate and life on Earth are deeply interconnected, trace the nexus of climate change and the evolution of human society, and demonstrate how our energy choices have inadvertently triggered a climate crisis. Subsequent chapters explore how people process risk as they respond to challenges, reflect on how major change was accomplished in America's past, and examine global approaches and U.S. political response to climate change. The concluding chapter highlights the moral imperatives that form the basis of trust to help pave the fraught road to lasting climate solutions. This textbook is ideal for undergraduate students in environmental science and non-science majors studying climate change within history, anthropology, ethics, political science, engineering, psychology, and other disciplines. It is also useful for professionals in areas related to environment and sustainability for advanced high school students as well as for a general readership. Supplementary resource materials to accompany the book include narrated videos, in-class activities, and PowerPoint slides. Provides a detailed overview of the social, scientific, and historical context framing climate change. Explains key concepts from climate science, geology, history, anthropology, sociology, and political science that are relevant to the field of climate change. Reviews global and national responses to the climate crisis and examines the politics of climate change in the United States. Traces the importance of scientific discourse informing policy within a democracy and discusses climate solutions based on trust in science.

Sailing Craft Edwin J. Schoettle, 1928 **Murder** David Solon Greenberg, 1916 [Twenty Sermons](#) Phillips Brooks, 1886 **Tricksters & Spirits** Mark H. Roe, 2025-12-23

Richly woven with ancestral wisdom and eerie enchantment, *Tricksters & Spirits* invites readers into the sacred and shadowed folklore of Ohio's Native tribes, where every riddle, spirit, and tale reveals timeless truths and the enduring power of story. Step into the forgotten valleys and misty forests of Ohio, where trickster spirits stir chaos, whisper riddles, and leave behind lessons wrapped in laughter and loss. In ten immersive chapters, author Mark H. Roe blends Native American mythology, regional folklore, and atmospheric storytelling to explore the balance between mischief and wisdom. From masked dancers who teach humility to owl spirits who guide dreamers through night visions, each tale invites readers into a world where the supernatural meets the sacred. Forest spirits test wanderers, wind spirits carry warnings, twin tricksters weave chaos and harmony into every step. These stories echo with oral tradition, tribal legend, and the haunting beauty of Ohio's spiritual landscape. Written in immersive third-person style with rich sensory detail, each chapter stands alone yet threads into a larger tapestry of spiritual symbolism, ancestral echoes, and timeless lessons. The spirits in these pages are not merely characters; they are reflections of deeper truths drawn from tribal memory and shaped by the land itself. This volume is part of a larger series exploring the mysteries and memories of the land, including themes of sacred balance, oral tradition, and the enduring power of story. Perfect for fans of Native American mythology and oral traditions, paranormal folklore, and spiritual mystery. Atmospheric nonfiction with regional depth. Legends of tricksters, shapeshifters, and spirit guides. Writers like Tony Hillerman, Robin Wall Kimmerer, and Daniel Taylor. Includes ten immersive

folklore chapters rooted in Native American and Ohio traditions A reflective outro that bridges into Volume 5 Songs of the Ancestors Themes of chaos wisdom humility and sacred memory A note from the author and a final thought on the power of stories
