Web Engineering:

Web Engineering Nora Koch,Piero Fraternali,Martin Wirsing,2004-07-07 Web engineering is a new discipline that addresses the pressing need for systematic and tool supported approaches for the development maintenance and testing of Web applications Web engineering builds upon well known and successful software engineering principles and practices adapting them to the special characteristics of Web applications Even more relevant is the enrichment with methods and techniques stemming from related areas like hypertext authoring human computer interaction content management and usability engineering The goal of the 4th International Conference on Web Engineering ICWE 2004 in line with the previous ICWE conferences was to work towards a better understanding of the issues related to Web application development Special attention was paid to emerging trends technologies and future visions to help the academic and industrial communities identify the most challenging tasks for their research and projects Following a number of successful workshops on Web engineering since 1997 at well known conferences such as ICSE and WWW the first conference on Web engineering was held in Caceres Spain in 2001 It was followed by ICWE 2002 in Santa Fe Argentina and ICWE 2003 in Oviedo Spain In 2004 ICWE moved to the center of Europe and was held in Munich Germany from July 26 to 30 ICWE 2004 was organized by the Institute for Informatics of the Ludwig Maximilians University at LMU Munich The ICWE 2004 edition received a total of 204 submissions out of which 25 papers were selected by the Program Committee as full papers 12 acceptance

Web Engineering David Lowe,Martin Gaedke,2011-04-06 Over the last few years Web Engineering has begun to gain mainstream acceptance within the software engineering IT and related disciplines In particular both researchers and practitioners are increasingly recognizing the unique characteristics of Web systems and what these characteristics imply in terms of the approaches we take to Web systems development and deployment in practice A scan of the publications in related conference proceedings and journals highlights the diversity of the discipline areas which contribute to both the richness and the complexity of Web Engineering The 5th International Conference on Web Engineering ICWE2005 held in Sydney Australia extends the traditions established by the earlier conferences in the series ICWE2004 in Munich Germany ICWE2003 in Oviedo Spain ICWE2002 in Santa Fe Argentina and ICWE2001 in Caceres Spain Not only have these conferences helped disseminate cutting edge research within the field of Web Engineering but they have also helped define and shape the discipline itself The program we have put together for ICWE2005 continues this evolution Indeed we can now begin to see the maturing of the field For possibly the first time there was very little debate within the Program Committee about which papers were in and out of scope and much more debate as to the each papers contributions to the field
