String Processing And Information Retrieval Proceedings:

String Processing and Information Retrieval Mario A. Nascimento, Edleno S. de Moura, Arlindo L. Oliveira, 2003-12-12 This volume of the Lecture Notes in Computer Science series provides a comprehensive state of the art survey of recent advances in string processing and information retrieval. It includes invited and research papers presented at the 10th International Symposium on String Processing and Information Retrieval SPIRE 2003 held in Manaus Brazil. SPIRE 2003 received 54 full submissions from 17 countries namely Argentina 2 Australia 2 Brazil 9 Canada 1 Chile 4 Colombia 2 Czech Republic 1 Finland 10 France 1 Japan 2 Korea 5 Malaysia 1 Portugal 2 Spain 6 Turkey 1 UK 1 USA 4 the numbers in parentheses indicate the number of submissions from that country. In the nontrivial task of selecting the papers to be published in these proceedings we were fortunate to count on a very international program committee with 43 members representing all continents but one. These people in turn used the help of 40 external referees. During the review process all but a few papers had four reviews instead of the usual three and at the end 21 submissions were accepted to be published as full papers yielding an acceptance rate of about 38%. An additional set of six short papers was also accepted. The technical program spans over the two well defined scopes of SPIRE string processing and information retrieval with a number of papers also focusing on important application domains such as bioinformatics. SPIRE 2003 also features two invited speakers Krishna Bharat Google Inc and João Meidanis State Univ of Campinas and Scylla Bioinformatics.
