Contemporary Nursing Knowledge Jacqueline Fawcett, Susan DeSanto-Madeya, 2012-11-27 The 3rd Edition of this AJN Book of the Year Award Winner helps you answer those questions with a unique approach to the scientific basis of nursing knowledge Using conceptual models grand theories and middle range theories as guidelines you will learn about the current state and future of nurse educators nurse researchers nurse administrators and practicing nurses *Chronic Illness* Ilene Morof Lubkin, 2006 The best selling Chronic Illness Impact and Intervention continues to focus on the various aspects of chronic illness that influence both patients and their families Topics include the sociological psychological ethical organizational and financial factors as well as individual and system outcomes The revised Sixth Edition includes new chapters on palliative care complementary and alternative therapies and self efficacy as well as added material on culturally competent care Intended for nurses social workers and rehabilitation professionals Chronic Illness demonstrates how the healthcare professional can efficiently and effectively assist the chronically ill in better managing their lives and coping with their conditions Theoretical Nursing Afaf Ibrahim Meleis, 2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher *Working with the Elderly* Irene Mortenson Burnside, 1986 *The Journal of Applied Social Sciences*, 1996 *Mental Health Care*, Google eBook Catherine Hungerford, Donna Hodgson, Richard Clancy, Tony Jones, Anthony Harrison, Chris Hart, 2012-02-02 A text written for non specialist mental health nursing courses and suitable for undergraduate students from nursing and other health disciplines which is supported by integrated online resources This is an adaptation of a Wiley Blackwell title by Harrison Hart editors Mental Health Care for Nurses designed to meet the needs of undergraduate students Mental Health Nursing is generally a core second year subject and may be taken by nurses paramedics occupational therapists and other health disciplines The focus is not on the general hospital as many nurses and other health professionals in Australia will not necessarily be working in the hospital setting It is important to consider the role of the multidisciplinary team The Roy Adaptation Model Callista Roy, Heather A.
