Technology And International Trade:

Trade, Technology, and International Competitiveness Irfan-ul-Haque,R. Martin N. Bell,1995-01-01 World Bank Technical Paper No 300 Provides an overview of past experiences with the introduction of agricultural technologies in World Bank funded projects in Mediterranean climates with an emphasis on the Middle East and North African region The authors review the adequacy of present crop and livestock technologies identify technical and socio economic constraints on their adoption and describe prospective technologies for pilot testing and full scale introduction in future Bank funded projects

Technology and International Trade Jan Fagerberg,1997 These essays theoretical as well as empirical study the relationships between technology growth international competitiveness and employment They also discuss the role of multinationals as vehicles for technology diffusion

Linking Trade and Technology Policies National Academy of Engineering,Steering Committee on Linking Trade and Technology Policies,1992-02-01 How is technology changing the nature of global competition Can governments devise policies that help to create comparative advantages for national firms An international group of experts in trade and technology policy addresses these questions in a book that contributes to a better understanding of how U S approaches to such policies differ from those of other industrialized countries It explores current trends in trade and technology policies and the consequences for U S economic competitiveness Topics discussed include the changing positions of the United States Japan and Germany in technological and trade competition the management of trade conflict in high technology industries and new approaches to linking trade and technology policy The book highlights the critical interplay of domestic and international policies and underscores the need for policymakers to achieve greater complementarity between their domestic and international economic policies

Technology Diffusion on the International Trade Network Gary D. Ferrier,2015 New technologies generate positive externalities non innovators can benefit through the adoption or imitation of the new technologies International trade serves as a major channel for technology diffusion allowing importing countries to acquire technical knowledge that they can potentially internalize To empirically test the effects of trade on technology diffusion the previous literature typically considers the effects of direct bilateral trade on indirect measures of technologies e g TFP We conjecture that the impact of trade on technology diffusion would be more accurately measured by taking into account both the direct and indirect network effects and by using direct measures of technologies e g intensity levels The international trade system can be considered as a weighted network Technology may be diffused not only bilaterally between countries but also through the network effects i e indirectly by trading with intermediate countries We find that the network effects of trade play a significant role in technology diffusion In most cases countries better connected on the trade network have higher technology intensities Further support for the importance of trade is provided by our finding that for outdated technologies better connected countries have lower technology intensities
