Technology, Crime, and Justice M. R. McGuire, 2012-06-14 As technology comes to characterize our world in ever more comprehensive ways there are increasing questions about how the rights and wrongs of technological use can be adequately categorized To date the scope of such questions have been limited focused upon specific technologies such as the internet or bio technology with little sense of any social or historical continuities in the way technology in general has been regulated In this book for the first time the question of technology and its relation to criminal justice is approached as a whole Technology Crime and Justice analyzes a range of technologies including information communications nuclear biological transport and weapons technologies amongst many others in order to pose three interrelated questions about their affects upon criminal justice and criminal opportunity to what extent can they really be said to provide new criminal opportunity or to enhance existing ones what are the key characteristics of the ways in which such technologies have been regulated how does

technology itself serve as a regulatory force both in crime control and social control more widely Technology Crime and Justice considers the implications of contemporary technology for the practice of criminal justice and relates them to key historical precedents in the way technology has been interpreted and controlled It outlines a new social way of thinking about technology in terms of its affects upon our bodies and what they can do most obviously the ways in which social life and our ability to causally interact with the world is extended in various ways It poses the question could anything like a Technomia of technology be identified a recognizable set of principles and sanctions which govern the way that it is produced and used principles also consistent with our sense of justice This book provides a key resource for students and scholars of both criminology and technology studies

The Technology of Law William Taylor Hughes,1893 In an introductory chapter the author points out that law is built around its maxims and leading cases hence they are called technics Author condenses leading cases into a table index digest and encyclopedia

Information Technology and the Criminal Justice System April Pattavina,2005 How has information technology changed the way we monitor criminal behavior How has it changed the way we examine patterns of criminal behavior How have criminal justice organizations adapted to using information technology What is the future of information in criminal justice There have been many technical analytical legal and organizational issues related to advances in computer and information technology over the past several decades Given the substantial investments that federal state and local criminal justice agencies are making in information technology they now consider it an integral component of understanding how our criminal justice system works Information Technology and the Criminal Justice System suggests that information technology in criminal justice will continue to challenge us to think about how we turn information into knowledge who can use that knowledge and for what purposes In this text editor April Pattavina synthesizes the growing body of research in information technology and criminal justice Contributors examine what has been learned from past experiences what the current state of IT is in various components of the criminal justice system and what challenges lie ahead Key Features Covers a broad array of topics including IT development and applications in organizations data quality issues legal issues and criminal justice education Spans a variety of criminal justice agencies including courts police and corrections Includes contributors renowned in the field of criminal justice information systems Incorporates case studies to enhance students understanding of real life situations Information Technology and the Criminal Justice System is recommended for upper level undergraduate and graduate level courses in Criminal Justice departments including Information Technology and Criminal Justice Criminal Justice Data Analysis Crime Analysis Technology and Criminal Justice and Technology and Society This book is also an excellent resource for professionals in the field

Technology, Innovation and Access to Justice Siddharth Peter De Souza,Maximilian Spohr,2023-01-16 Around four billion people globally are unable to address their everyday legal problems and do not have the security opportunity or protection to redress their grievances and injustices

Digital Justice Ethan Katsh,Orna Rabinovich-Einy,2017-03-09 Improving access to

justice has been an ongoing process and on demand justice should be a natural part of our increasingly on demand society What can we do for example when Facebook blocks our account we re harassed on Twitter discover that our credit report contains errors or receive a negative review on Airbnb How do we effectively resolve these and other such issues Digital Justice introduces the reader to new technological tools to resolve and prevent disputes bringing dispute resolution to cyberspace where those who would never look to a court for assistance can find help for instance via a smartphone The authors focus particular attention on five areas that have seen great innovation as well as large volumes of disputes ecommerce healthcare social media labor and the courts As conflicts escalate with the increase in innovation the authors emphasize the need for new dispute resolution processes and new ways to avoid disputes something that has been ignored by those seeking to improve access to justice in the past

Machine See, Machine Do Patrick K. Lin,2021-12-13 *Digital Justice* M. Ethan Katsh,Orna Rabinovich-Einy,2017 Improving access to justice has been an ongoing but frustrating goal of our society The theme of this work is that we have new technological tools to resolve disputes and new tools to prevent disputes *Introducing Technology Justice* Amber Mickle,2015 Access to Information, Technology, and Justice Ursula Gorham,2017-06-30 Over the past fifteen years the dramatic increase of online self help legal re sources information and tools specifically developed for use by low income individuals without legal counsel has been promoted as one way to help those individuals who are caught in this justice gap Unfortunately however opportunities arising from the Internet and related information and communication technologies do not accrue to everyone equally as physical intellectual and social barriers to information persist Access to Information Technology and Justice A Critical Intersection as the first ever book length examination of the use of technology to expand access to justice in the United States highlights an emerging paradox wherein the technological transformation that has created an increasing array of legal self help resources and services is also creating barriers to access for disadvantaged individuals Those who cannot read those who do not speak the English language those who are unfamiliar with the law and those with limited digital literacy skills all find themselves at a fundamental disadvantage The legal community has only begun to examine whether these resources and services are in fact meeting the needs of struggling self help users This book builds upon existing work in this area by undertaking an in depth exploration of how information and communication technologies are changing and failing to change the legal in formation landscape for those who most need this information Drawing upon the ongoing collaborative efforts of legal aid organizations libraries courts and non profit organizations this book provides a framework for removing barriers to equitable access to legal information with the ultimate goal of encouraging continued discussion and action

The regime of Amalgamation of law and technology "Boon or Bane" Rahul Pradhan,2016-12-22 Seminar paper from the year 2016 in the subject Law Miscellaneous grade 4 6 7 Damodaram Sanjivayya National Law University course B A LL B language English abstract The paper will be highlighting the need for technology as an hour of need The author here has made an effort to analyze the role

of the judiciary in compelling the lawyers in indulging in such thing The paper shall also deal at length with the different types of issues that are maligning the idea of information communication technology and how it could be catastrophic ICT is an ellipsis that stands for Information Communication Technology A novel way to think about ICT is to consider all the uses of digital technology that already exist to help individuals businesses and organizations use information through telecommunications ICT covers any product that will store retrieve manipulate transmit or receive information electronically in a digital form Lawyer s played an important and curtail role in the society which encompasses a lot s of documentation and information handling storage and salvage The info intensiveness of a lawyer s accountability is such that tools and technologies that would speed up the documentation management and information handling are not only important but professionally necessary The various technologies available has not only minimized the pressure upon a lawyer but has also saved time As the title suggest everything has its own pros and cons The idea of technology has however served as a measure against the upcoming challenges Prevention is better than cure The idea of law backed by technology serves as a solution to future problems With the pendency of cases before the courts the idea of technology functions a better purpose The idea of technology doesn t escalate the fact that the impacts aren t severe The use of technology is a paperless work and hassle free The overdependence on technology might lead to lethargy and unwillingness to work hard The situation and the hour of the need compel the budding lawyers to become adept in such activities to avoid being prone to strenuous workload The value of accuracy correctness completeness relevance and timeliness are characteristics of information which ICT systems do generate to meet lawyer s information needs The paper at large will be dealing with pros and cons of adapting technology in the field of law

Criminal Justice Technology in the 21st Century Laura J. Moriarty, 2025 The fourth edition of Criminal Justice Technology in the 21st Century comes just about five years after the COVID 19 pandemic when technology took a more prominent role in our everyday lives and more importantly in the criminal justice system Ideas that once were mere thoughts from academics pondering the future have become everyday realities While most areas of life came to a standstill as the pandemic ensued the criminal justice system could not stop Crime adapts more seamlessly than other aspects of society and as such the criminal justice system needed to adapt as well The contributing authors were asked to consider the pandemic and its impact on evolving technology and advancements to address crime Likewise other societal concerns focusing on law enforcement and its questionable use of force at times have escalated the need for technology to ensure that over policing in minority neighborhoods and accountability is established or not to deescalate violence whether police brutality or protester police violence The impact of technology remains to be seen but there is real hope that such technology can begin to shed light on what is happening in these volatile situations Either the current contributors have updated their chapters from the Third Edition or there are new contributors focusing on the abovementioned issues This fourth edition with more than 20 contributors highlights the most current thinking about criminal justice technology The book is longer than the

previous editions but has fewer chapters This is the result of paring down what is included in this new edition The hope is that these chapters will be the most relevant and useful to both the expert and the neophyte Criminal justice technology will continue to advance and we must keep abreast of new trends

Economics and Law of Artificial Intelligence Georgios I. Zekos,2021-01-11 This book presents a comprehensive analysis of the alterations and problems caused by new technologies in all fields of the global digital economy The impact of artificial intelligence AI not only on law but also on economics is examined In the first part the economics of AI are explored including topics such as e globalization and digital economy corporate governance risk management and risk development followed by a quantitative econometric analysis which utilizes regressions stipulating the scale of the impact In the second part the author presents the law of AI covering topics such as the law of electronic technology legal issues AI and intellectual property rights and legalizing AI Case studies from different countries are presented as well as a specific analysis of international law and common law This book is a must read for scholars and students of law economics and business as well as policy makers and practitioners interested in a better understanding of legal and economic aspects and issues of AI and how to deal with them *The Law Quarterly Review*,1894

Law and the Semantic Web Richard Benjamins,Bran Selic,Aldo Gangemi,2005-03-07 by Roberto Cencioni At the Lisbon Summit in March 2000 European heads of state and government set a new goal for the European Union to become the most competitive knowled based society in the world by 2010 As part of this objective ICT information and communication technologies services should become available for every citizen and for all schools homes and businesses The book you have in front of you is about Semantic Web technology and law Law is something omnipresent all citizens at some points in their lives have to deal with it In addition law involves a large group of professionals and is a mul billion business world wide Information technology is important because it that can improve citizens interaction with law as well as improve legal professionals work environment Legal professionals dedicate a significant amount of their time to finding reading analyzing and synthesizing information in order to take decisions and prepare advice and trials among other tasks As part of the Semantic Based Knowledge and Content Systems Strategic Objective the European Commission is funding projects to construct technology to make the Semantic Web vision come true 1 The articles in this book are related to two current foci of the Strategic Objective Knowledge acquisition and modelling capturing knowledge from raw information and multimedia content in webs and other distributed repositories to turn poorly structured information into machi processable knowledge

Digital Dead End Virginia Eubanks,2012-09-21 The realities of the high tech global economy for women and families in the United States The idea that technology will pave the road to prosperity has been promoted through both boom and bust Today we are told that universal broadband access high tech jobs and cutting edge science will pull us out of our current economic downturn and move us toward social and economic equality In Digital Dead End Virginia Eubanks argues that to believe this is to engage in a kind of magical thinking a technological utopia will come about simply because we want it to

This vision of the miraculous power of high tech development is driven by flawed assumptions about race class and gender. The realities of the information age are more complicated particularly for poor and working class women and families. For them information technology can be both a tool of liberation and a means of oppression. But despite the inequities of the high tech global economy optimism and innovation flourished when Eubanks worked with a community of resourceful women living at her local YWCA. Eubanks describes a new approach to creating a broadly inclusive and empowering technology for people popular technology which entails shifting the focus from teaching technical skill to nurturing critical technological citizenship building resources for learning and fostering social movement. Important Notice: The digital edition of this book is missing some of the images found in the physical edition. [Technology and Justice](#) George Grant, 1986. George Grant philosopher conservative Canadian nationalist Christian was one of Canada's most significant thinkers and the author of *Lament for a Nation*, *Technology and Empire* and *English Speaking*. Justice Admirers and critics of the author will welcome these compelling essays about society's traditional values in a technological age. [The Massachusetts register](#), 1992-07-03. [The Technology Monthly and Harvard Engineering Journal](#), 1914.
