**Technology and the Human Condition** Bernard Gendron,1976-12 [The Techno-Human Condition](#) Braden R. Allenby, Daniel Sarewitz,2011-04-22 A provocative analysis of what it means to be human in an era of incomprehensible technological complexity and change In [The Techno Human Condition](#) Braden Allenby and Daniel Sarewitz explore what it means to be human in an era of incomprehensible technological complexity and change They argue that if we are to have any prospect of managing that complexity we will need to escape the shackles of current assumptions about rationality progress and certainty even as we maintain a commitment to fundamental human values Humans have been co evolving with their technologies since the dawn of prehistory What is different now is that we have moved beyond external technological interventions to transform ourselves from the inside out even as we also remake the Earth system itself Coping with this new reality say Allenby and Sarewitz means liberating ourselves from such categories as human technological and natural to embrace a new techno human relationship Contributors Boris Barbour Mario Biagioli Paul S Brookes Finn Brunton Alex Csiszar Alessandro Delfanti Emmanuel Didier Sarah de Rijcke Daniele Fanelli Yves Gingras James R Griesemer Catherine Guaspare Marie Andr e Jacob Barbara M Kehm Cyril Labb Jennifer Lin Alexandra Lippman Burkhard Morganstern Ivan Oransky Michael Power Sergio Sismondo Brandon Stell Tereza St ckelov Elizabeth Wager Paul Wouters **Homo Faber** Paolo Benanti,2018-12-07T10:18:00+01:00 In [Homo Faber](#) Paolo Benanti seeks to provide a philosophical and theological understanding of the technological phenomenon by casting light contemporaneously on the ethical dimensions connected to it In constructing a holistic vision of technique technology he asks himself how to look at the technological artifacts how it was possible that the West has undergone an incomparable technological development in respect to any other human culture and what this reveals and means for technology and what is the context in which technology is implemented and understood today As a result of his journey Benanti shows how Technology is not a simple human activity but human nature is a techno human condition **Illusions of Freedom** Jeffrey M. Shaw,2014 Contemporary technology has the potential to hinder humanity s attainment of freedom in the opinion of Thomas Merton and Jacques Ellul Both thinkers offer unique perspectives on the impact that they believe technology has had on society in the twentiethcentury and they both offer unconventional definitions of the concept of freedom Shaw compares their views on technology and its impact on freedom and in doing so allows those who may not be familiar with either of these thinkers to investigate some of their other writing more thoroughly **The Human Condition** Hannah Arendt,2019-01-11 The renowned political thinker and author of [The Origins of Totalitarianism](#) examines the troubling consequences of humanity s increasing power A work of striking originality [The Human Condition](#) is in many respects more relevant today than when it first appeared in 1958 In her study of the state of modern humanity Hannah Arendt considers humankind in terms of its ever expanding capabilities Her analysis reveals a troubling paradox that as human powers increase through technological and humanistic inquiry we are less equipped to

control the consequences of our actions This new edition contains Margaret Canovan s 1998 introduction and a new foreword by Danielle Allen A classic in political and social theory The Human Condition offers a penetrating analysis of a conundrum that has only become more acute in the 21st century

**Questioning Technology with Jacques Ellul** David W. Gill,Lisa Richmond,2025-10-07 Twenty first century technology is an ever expanding powerful force in virtually every aspect of human life and every corner of the globe So much of modern technology has resulted in positive improvements in communication work health and other domains Technology s promises and possibilities for the future are often glowing But it is one thing for technology to function as a tool serving human purpose and flourishing and quite another for it to be granted the position of unquestioned master All technologies deserve to be questioned What are their costs trade offs and potential or real negative impact And how do we create limits and controls for technological invasion when these would be wise and necessary Questioning Technology with Jacques Ellul addresses these questions in both the big picture and in their relevance to specific arenas such as art politics work and religion with voices from not just the academy but also the workplace and society
