**The Trouble with Darwin** Kiki Thorpe, 2002 When the Thornberrys travel to Tanzania to visit Dr Jane Goodall's chimpanzee sanctuary Eliza's pet chimpanzee Darwin is captured by poachers Charles Darwin's Works: The life and letters of Charles Darwin... ed. by his son, Francis Darwin. 2v Charles Darwin, 1896 **"The" Language of Science** Ilse Nina Bulhof, 1992 In modern times science has avoided rhetorical and poetical forms Its hallmarks were brevity and exactitude with disdain for non functional ornamentation This book shows that the language of scientists does remain language and that a skillful use of its rhetorical and poetic aspects often determines the facts and the transmission of information The exceptional literary qualities of Darwin's *The Origin of Species* are taken as a point in case The importance of language in science has ontological implications science can no longer be considered an action performed by a speaking subject on a mute object Does the creative role of language in science mean that human beings create the world The author emphatically rejects a conclusion which would degrade nature to mere malleable material at the mercy of human beings A hermeneutical model for the relationship between knower and known is suggested creative interaction between reader and text The reader's responses actualise a text's meaning in like manner scientists give their responses to reality by actualising one of many possibilities The hermeneutical ontology proposed in this book steers away from the rocks of realism and anti realism **Charles Darwin and the Theory of Natural Selection** Sir Edward Bagnall Poulton, 1896 The Evolution of Charles Darwin George Amos Dorsey, 1927 **Truth for its own sake: the story of C. Darwin** W. Mawer, 1889

**Evolution and Human Behavior** John Cartwright, 2000 The book covers fundamental issues such as the origins and function of sexual reproduction mating behavior human mate choice patterns of violence in families altruistic behavior the evolution of brain size and the origins of language the modular mind and the relationship between genes and culture The life and letters of Charles Darwin...ed. by his son, Francis Darwin. 2 v Charles Darwin, 1898 **The Life and Letters of Charles Darwin** Charles Darwin, 1919 **The Bookman's Journal and Print Collector** Wilfred Partington, 1922 **The Bookman's Journal with which is Incorporated The Print Collector**, 1922 **The Problem of Human Life Here and Hereafter** Alexander Wilford Hall, 1877 **Charles Darwin and the Origin of Species** Sir Edward Bagnall Poulton, 1909 The Problem of Human Life Alexander Wilford Hall, 1877 **Jackanapes ; Daddy Darwin's Dovecot ; The Story of a Short Life** Juliana Horatia Ewing, 1896 **Outlook** Alfred Emanuel Smith, Francis Walton, 1894 **Records of the Proceedings and Printed Papers of the Parliament** Australia. Parliament, 1914 *The Old Testament Student*, 1886 **The Medium and Daybreak**, 1882 *The Structure of Evolutionary Theory* Stephen Jay Gould, 2002-03-21 The world's most revered and eloquent interpreter of evolutionary ideas offers here a work of explanatory force unprecedented in our time a landmark publication both for its historical sweep and for its scientific vision With characteristic attention to detail Stephen Jay Gould first describes the content and discusses the history and origins of the three core commitments of classical

Darwinism that natural selection works on organisms not genes or species that it is almost exclusively the mechanism of adaptive evolutionary change and that these changes are incremental not drastic Next he examines the three critiques that currently challenge this classic Darwinian edifice that selection operates on multiple levels from the gene to the group that evolution proceeds by a variety of mechanisms not just natural selection and that causes operating at broader scales including catastrophes have figured prominently in the course of evolution Then in a stunning tour de force that will likely stimulate discussion and debate for decades Gould proposes his own system for integrating these classical commitments and contemporary critiques into a new structure of evolutionary thought In 2001 the Library of Congress named Stephen Jay Gould one of America's eighty three Living Legends people who embody the quintessentially American ideal of individual creativity conviction dedication and exuberance Each of these qualities finds full expression in this peerless work the likes of which the scientific world has not seen and may not see again for well over a century
