They Left Their Tracks:

They Left Their Tracks Howard Copenhaver, 1990 **Angalkut/Shamans in Yup'ik Oral Tradition** Ann Fienup-Riordan, 2025-10-15 Angalkut Shamans in Yup'ik Oral Tradition collects over thirty years worth of shaman stories told as part of gatherings organized by Calista Education and Culture to document Yup'ik traditional knowledge. These conversations highlight the critical role angalkut played in Yup'ik life: healing the sick, interpreting dreams and unusual experiences, requesting future abundance through masked dances and other ceremonies protecting the lives of young children and dealing with the dead. The book begins with an English introduction that places Yup'ik oral traditions in the context of shamanism in Alaska and other parts of the Arctic. Then first person accounts presented in the original Yup'ik with accompanying English translations discuss the importance of shamans and shamanism in general: good and bad shamans and shamans as healers. Narratives from Nelson Island, Canineq, Kuskokwim River, Akulmiut and Yukon River describe shamans as healers, shaman journeys and performances, shamans and masked dances, requesting abundance, shamans and the dead, malicious shamans, shaman confrontations, becoming a shaman and those who have shaman abilities today. A detailed glossary and references are also included. Today not only are these angalkut gone but so are those who witnessed and participated in their activities. Angalkut Shamans in Yup'ik Oral Tradition is the first book devoted exclusively to Yup'ik angalkut. Never before has the variety of angalkut roles been profiled in publication, including the richness of elders' recollections of these individuals and their roles. There is great value in the stories they left behind. This fine-grained presentation of unique bilingual first person narratives is an essential resource for scholars and students interested in Yup'ik heritage, Yugtun language, shaman ethnography and Alaska Native oral traditions.

Dinosaurs - The Grand Tour, Second Edition Keiron Pim, 2019-12-10 Bigger and Better Updated and Expanded. We live in a golden age of paleontological discovery; on average we find one new dinosaur species per week. The most fascinating among them take their place in this updated edition of *Dinosaurs: The Grand Tour* from Aardonyx, a lumbering beast that formed a link between two and four legged dinosaurs to Zuniceratops who boasted a deadly pair of horns. Here you'll find everything worth knowing about every dinosaur worth knowing, more than 300 in all, including Amphibious Halszkaraptor, looks like no other dinosaur we've found with a head and body the size of a duck's sharp claws and a swanlike neck longer than a blue whale and three times taller than a giraffe. Patagotitan is a newly discovered contender for biggest dinosaur ever. The speedy little feathered predator Stenonychosaurus was an anatomical marvel with retractable claws, asymmetrical ears for advanced hearing, incredible night vision and a huge brain. Oviraptor whose name means egg thief doesn't deserve its bad rap. This specimen from 1923 is now proven to have been sitting by its own eggs, not stealing another's. Sinornithosaurus prove that dinosaurs shed their skin the same way that humans do, rather than sloughing it off all at once like a snake. At a glance, sidebars put each dinosaur's diet, size and location at your fingertips. Stories of

harrowing expeditions conjure the thrills of history s most famous dinosaur hunters Highlights from recent research reveal what s new in paleontology today including scientists evolving idea of what dinosaurs actually looked like Hint They were more colorful and feathery than we ever thought before And illustrations on virtually every page bring these prehistoric creatures to life in all their glory
