The Perception Transformation Collection: 3 Books in 1 Bundle - How to See and Think Differently Chris Smythe, How to See and Think Differently. Is life hard or are we just making it up in our own mind? What we perceive is what we believe, and all this is based on what we hear, see, feel, and think. Our perception drives our behaviors every day, and our thoughts are perhaps the most crucial components of our ability to perceive. In this 3 books in 1 bundle, we will discuss in detail the power of our perception and explore how the way our mind works affects our perception. We will take a closer look at how each of us perceives the sight and sound we receive in a way which is very different from each other's. We will also discuss the importance of perception in our understanding of what reality really is and reveal some shocking Real Life Scenarios which will consolidate your understanding of our perception. We'll be diving into topics that all of us will face: Herd mentality, insecurity, and topics related to how we can Think Outside The Box. We'll talk about why and how people act the same way or adopt similar behaviors as the people around them, often ignoring their own feelings in the process. It Only Takes One Opportunity To Change Someone's Life. For the last book, we will learn and find out how to take advantage of the opportunities around us. We have countless opportunities around us that go wasted every day, and this is due to the lack of awareness that we have regarding the importance of creating opportunities for ourselves. Whether it is regarding that someone special, family, friends, co-workers, acquaintances, new individuals, or jobs around us, magical opportunities are always waiting for us, but we have to be able to recognize an opportunity when we see one. If we all can be more aware of our surroundings, one opportunity can change everything and help us progress towards success. Download this powerful 3 in 1 guide to learn more.

Lateral Thinking Edward De Bono, 1998. [Lateral Thinking](#) Edward de Bono, 2014-08-07. Why do some people always seem to have new ideas while others of equal intelligence never do? Lateral Thinking is Edward de Bono's original portrayal of what lateral thinking is, how it works, and how to use it to develop your own potential for thinking and problem solving. First published in 1967 as *The Use of Lateral Thinking*, this classic international bestseller remains as relevant to learning, problem solving, and creative thinking today as when it was first published. De Bono argues that conventional vertical thinking often inhibits our ability to solve problems and come up with new ideas. He then shows that lateral thinking is a far easier and more natural way to generate simple, sound, and effective ideas and offers guidance on how to develop your own ability to think laterally. Lateral thinking is a technique that anyone can learn and benefit from.
