## Using Self Psychology In Psychotherapy:

**Using Self Psychology in Psychotherapy** Helene Jackson, 1994-03-01 Self psychology offers a new perception of how pathology develops. It emerges not from intrapsychic conflict but from the pervasive absence of empathically responsive selfobject in the child's inner and outer world. The goal of this book is to familiarize mental health professionals with this new approach to human behavior and demonstrate its implications for treatment in various stages of development and in a broad range of situations. Mental health professionals who are familiar with the concepts of self psychology will find this book useful in expanding their treatment ideas. For those who are unfamiliar with self psychology, this material will provide new, different, exciting, and effective ways of thinking about patients and intervening in the treatment relationship. White, Marcella Bakur Weiner, 2014-05-12 First published in 1987. The purpose of this book is to offer insights and guidelines for psychoanalytic and psychotherapeutic treatment to the practitioner working or planning to work with the late Heinz Kohut's concepts of self psychology. By integrating theory and practice, the authors offer case material from their therapeutic experience showing how self psychology can be used with a wide range of patients, culminating in outcomes that are not only beneficial but also exciting and sometimes surprising. [The Kohut Seminars on Self Psychology and Psychotherapy with Adolescents and Young Adults](#) Heinz Kohut, Miriam Elson, 1974 *Self Psychology* Jill Gardner, 2024-09-04 This book offers an in-depth explanation of the concepts of self psychology and pragmatic steps for recognizing and using these concepts in clinical work, helping clinicians move from theory to practice. Both early and contemporary concepts in self psychology and intersubjectivity theory are discussed in successive chapters of the book with illustrative examples drawn from the author's experience working in diverse settings with a wide range of mental health practitioners. Individual chapters shed light on brief treatment, supervision, interpretation, development, agency, and nuances of empathic communication among other topics. In addressing these topics, specific tools for conceptualizing clinical data and guidelines for intervention are also described. The emphasis is on helping people via a sustained focus on their internal subjective experience and creating a new selfobject.
