support the teaching of number skills at the primary phase with particular emphasis given to the 4-8 years age range. From the outset the authors take great care to set out their credentials and the scope of their writing. It is clear that the guidance, teaching approach and activities offered in the book have been thoroughly tried and tested throughout the 1990s during research and development work with teachers in Australia, England and the USA in the Mathematics Recovery (MR) and Count Me In Too (CMIT) projects. Mathematics in Schools. This book provides a structured approach to the teaching of early numeracy which has been extensively developed through the Mathematics Recovery and Count Me In Too Projects in Australia, the United Kingdom and the United States. The book lets teachers identify where their students are in terms of number skills and sets out a strategy for developing their knowledge. The authors show how to advance children's learning across five stages: emergent, perceptual, figurative, initial number and facile number. This provides for increasingly sophisticated number strategies. Teaching procedures are organised into key teaching topics and each includes a clearly defined purpose, detailed teaching procedures and learning tasks, application in whole class, small group and individualised settings, a link to the Learning Framework in Number. The activities have been tested by practitioners in Australia, the United States and the United Kingdom and can be used within each country's numeracy strategy. This book will be useful to primary teachers, especially in the early years, mathematics coordinators, heads of school, mathematics advisers, learning support personnel, lecturers and educational psychologists. This book builds on the assessment of children's strategies set out in the authors' *Early Numeracy* (Paul Chapman Publishing, 2000). *Corrective Reading Techniques* (Joan P. Gipe, 1991). The five levels of language proficiency reflect characteristics of language performance at each developmental stage and include starting (L1), emerging (L2), developing (L3), expanding (L4) and bridging (L5).
