

Working Communication

Alexander Campbell Kidd

Working Communication:

Virtual Working Paul Jackson, 2002-01-31 This book addresses the social and organisational dynamics which underlie recent technological and work developments within organisations often referred to as virtual working It seeks to go beyond a mere description of this new work phenomenon in order to provide more rigorous ways of analysing and understanding the issues raised In addition to providing accounts of developments such as web based enterprises and virtual teams each contributor focuses on the employment of information technology to transcend the boundaries between and within organisations and the consequences this has for social and organisational relations

Survival under Uncertainty Dimitri Volchenkov, 2016-06-28 This book introduces and studies a number of stochastic models of subsistence communication social evolution and political transition that will allow the reader to grasp the role of uncertainty as a fundamental property of our irreversible world At the same time it aims to bring about a more interdisciplinary and quantitative approach across very diverse fields of research in the humanities and social sciences Through the examples treated in this work including anthropology demography migration geopolitics management and bioecology among other things evidence is gathered to show that volatile environments may change the rules of the evolutionary selection and dynamics of any social system creating a situation of adaptive uncertainty in particular whenever the rate of change of the environment exceeds the rate of adaptation Last but not least it is hoped that this book will contribute to the understanding that inherent randomness can also be a great opportunity for social systems and individuals alike to help face the challenge of survival under uncertainty

Electrical Communication, 1927 *Educational Innovation in Economics and Business* V L. Borghans, 2000 The Information and Communication Technology revolution results in profound changes to the heart of business and economics Changes in the workplace new communication technology new organizational structures and new production technologies force business educators to

renew their focus on the curricula of business schools There is no doubt these changes influence business education and instructional technology But change will go far beyond the mere introduction of technology in the classroom Alliances between the corporate world and business education are no longer fictitious but are necessary to establish stronger bonds between educational systems and the workplace The fifth volume in the series Educational Innovation in Economics and Business contains a unique selection of articles addressing various issues on how business education should adapt to changing needs of the corporate world It is meant for educators in corporate training centers and for teachers in further and higher education
