Henri Garenne

The Person Inside:

Animacy in Cognition: Effects, Mechanisms, and Theories Michael J. Serra, Josefa N. S. Pandeirada, Joshua VanArsdall, 2024-11-19 People and animals broadly animates are important dynamic forces in the natural world They represent social targets such as friends and enemies economic and romantic partners predators and prey and companions Most importantly unlike inanimate objects animate agents have internal goals and drives that cause them to act on the world rather than simply be acted on In short animates fill our world with novel causes and have been a consistent selection pressure over the course of evolution human and nonhuman Cognitive scientists have long acknowledged the importance of animacy investigating it as a perceptual phenomenon as a component of language a natural category a demand on attention a dimension of neurological organization and more recently as an important factor in memory Although animacy has been a dimension of interest in cognitive science for quite some time cognitive scientists from different subdisciplines interested in animacy e g perception attention language and memory rarely talk with one another to synthesize findings across subfields A major goal of this research topic is to solicit articles from across cognitive science in a broad sense that investigate the role that animacy plays in cognition in the hopes that authors and readers may begin to see the bigger picture regarding how animacy influences the mind We hope that by bringing together researchers from across cognitive science we will hear from a diverse set of perspectives regarding animacy representing a variety of research questions and methodologies within this larger topic Likewise we hope that the finished research topic will lead to an increased and more varied exploration of the role of animacy in our thoughts and actions and will appeal to readers across fields [The Corporatization of Student Affairs](#)

Daniel K. Cairo, Victoria Cabal, 2021-11-03 This volume explores the tensions between the student affairs foundation of holistic student development and the changing culture of corporatization While there is ample evidence of neoliberalism in the academic affairs of higher education there is very little to no research to understand how neoliberalism is driving the corporatization of student affairs This book argues that understanding neoliberalism in student affairs is crucial to student success and the student experience The authors provide contextualized examples for understanding our positionality within the neoliberal system as well as practical recommendations on resisting market values as common sense thereby helping to preserve the profession and to imagine a new one centered on people equity and justice

Yuendumu Everyday Yasmine Musharbash, 2008 This book explores intimacy immediacy and mobility as the core principles underpinning contemporary everyday life in a central Australian Aboriginal settlement It analyses an everyday shaped through the interplay between a not so distant hunter gatherer past and the realities of living in a first world nation state by considering such apparently mundane matters as What is a camp How does that relate to houses Who sleeps where and next to whom Why does this constantly change What and where are the public private boundaries And most importantly How do Indigenous people relate to each other Employing a refreshingly readable writing style Musharbash includes rich vignettes including narrative

portraits of five Warlpiri women Musharbash's descriptions and analyses of their actions and the situations they find themselves in transcend the general and illuminate the personal She invites readers to ponder the questions raised by the book not just at an abstract level but as they relate to people's actual lives In doing so it expands our understandings of Indigenous Australia

The Value of Empathy Maria Baghramian, Meline Papazian, Rowland Stout, 2020-12-18 The Value of Empathy explores various approaches to understanding empathy and investigates its moral and practical role The central role of empathy in understanding others and the need for it in our social and inter personal encounters is widely acknowledged by philosophers social scientists and psychologists alike Discussions of empathy abound not only in more specialised academic publications but also in traditional and social media Yet neither a clear understanding nor a uniform definition of this relatively new term is available Indeed one difficulty in discussing empathy in philosophy and beyond is the profusion of definitions the difficulty is compounded by a lack of clarity in the distinction between empathy and cognate concepts such as sympathy and compassion This book has two aims Chapters 1-5 seek to address the dual concerns of the lack of clarity and profusion of interpretations by suggesting new ways of approaching the topic The second aim of the book is to connect the more abstract discussions of empathy with its normative functions Chapters 6-8 engage with the theoretical concerns relevant to the ethics of empathy and raise interesting points about its significance in ethical thought and action The final four chapters focus on the practical normative significance of empathy by examining the connections between empathy vulnerability and care in circumstances of ill health The chapters in this book were originally published in the International Journal of Philosophical Studies

Philosophy through Computer Science Daniel Lim, 2023-03-17 What do philosophy and computer science have in common It turns out quite a lot In providing an introduction to computer science using Python Daniel Lim presents in this book key philosophical issues ranging from external world skepticism to the existence of God to the problem of induction These issues and others are introduced through the use of critical computational concepts ranging from image manipulation to recursive programming to elementary machine learning techniques In illuminating some of the overlapping conceptual spaces of computer science and philosophy Lim teaches readers fundamental programming skills and allows them to develop the critical thinking skills essential for examining some of the enduring questions of philosophy Key Features Teaches readers actual computer programming not merely ideas about computers Includes fun programming projects like digital image manipulation and Game of Life simulation allowing the reader to develop the ability to write larger computer programs that require decomposition abstraction and algorithmic thinking Uses computational concepts to introduce clarify and develop a variety of philosophical issues Covers various aspects of machine learning and relates them to philosophical issues involving science and induction as well as to ethical issues Provides a framework to critically analyze arguments in classic and contemporary philosophical debates

Sacrifice and Moral Philosophy Marcel van Ackeren, Alfred Archer, 2020-09-10 The aim of this book is to foster a more explicit and

direct discussion of the concept of sacrifice and its importance in moral philosophy Acts of self sacrifice have a special place in our moral lives We admire and celebrate those who give up their lives so that others may live Despite this important role that sacrifice plays in our moral thinking moral philosophers have had surprisingly little to say about the nature of sacrifice This lack of attention to the nature of sacrifice is particularly important given that sacrifice also has an important role to play in several key debates in moral philosophy The chapters in this volume make an important contribution to our understanding of sacrifice in three areas The first part of the book investigates the nature of sacrifice The next group of chapters investigates the role of sacrifice in moral philosophy Three of these pieces investigate the role of sacrifice in our moral lives generally while two investigate the role of sacrifice in relation to particular moral theories The final two chapters investigate the value of sacrifice in relation to political and theological issues The chapters in this book were originally published as a special issue of the International Journal of Philosophical Studies *Official Gazette Philippines*,1919 **Transactions** Liverpool Engineering Society,1921 North Carolina Reports North Carolina. Supreme Court,1995 Cases argued and determined in the Supreme Court of North Carolina *New York Court of Appeals. Records and Briefs*. New York (State),
