## Thinking About Race:

Thinking Race Richard A. Goldsby, Mary Catherine Bateson, 2019-09-09 Thinking Race clarifies the relationship between biology and race showing how racism can result from a misguided blending of biology with social construction Using arresting examples Richard Goldsby and Mary Catherine Bateson aim to help readers accept the reality of human difference while understanding human unity Controversial issues of race and IQ race and athletic ability and perceptions of race and beauty are examined as are those of affirmative action and reparations for slavery The authors also explore how income inequality healthcare disparities unequal access to education an unfair justice system and mass incarceration all call for constructive social policies that remodel American society in ways that will build a better more resilient and happier society The goal is a society in which equal civil rights are clearly derived from the recognition of equal human rights and equal opportunity provides the pathway to equitable results

**Thinking about Race** Naomi Zack, 1998 All introductory and ethics courses are taught either historically or topically with professors selecting anything from a single text to several primary source paperbacks This text is designed for almost any student at almost any school It addresses a topic of high interest to students and professors and is extremely timely This text would be most likely be used in conjunction with at least one other book Zack in particular is ideally suited for this work as she herself is of mixed race

*The Nature of Race* Ann Morning, 2011-06-24 What do Americans think race means What determines one's race appearance ancestry genes or culture How do education government and business influence our views on race To unravel these complex questions Ann Morning takes a close look at how scientists are influencing ideas about race through teaching and textbooks Drawing from in depth interviews with biologists anthropologists and undergraduates Morning explores different conceptions of race finding for example that while many sociologists now assume that race is a social invention or construct anthropologists and biologists are far from such a consensus She discusses powerful new genetic accounts of race and considers how corporations and the government use scientific research for example in designing DNA ancestry tests or census questionnaires in ways that often reinforce the idea that race is biologically determined Widening the debate about race beyond the pages of scholarly journals The Nature of Race dissects competing definitions in straightforward language to reveal the logic and assumptions underpinning today's claims about human difference
