Worldwide Eva Marsal, Takara Dobashi, Barbara Weber, 2009 Philosophizing for with and by children in a community of inquiry has proven to be an internationally successful learning strategy that enhances both the cognitive and emotional growth of children. Pioneering democratic programs for philosophizing with children now exist throughout the world. The work described in this book represents the latest research on theoretical concepts and applied projects within this field and brings together contributions from twenty nine countries representing all continents. The authors address questions on the theoretical foundation of Philosophy for Children, the application of philosophical methods, the community of inquiry, international and national didactical concepts as well as the evaluation of those concepts. A primary goal of this book is to enhance intercultural academic exchange and to encourage further research and practical work in this field. **Once Upon an If** Peter Worley, 2014-01-31 If you want to tell more stories in the classroom but lack the confidence to do so. If you need guidance finding stories that are good to get children thinking. If you like using stories in your teaching but want to get more from them than the moral at the end. **Once Upon an If** is the book for you. In his brand new book award winning author Peter Worley provides a comprehensive guide to everything a would be storyteller needs including how to bring a story to life, tips on how to memorise a story and improvise descriptions and techniques for using tone, movement and timing to engage and involve the children in your class. **Once Upon an If** also comprises a treasury of stories, new and old, written especially to get a young audience thinking actively about the deeper issues that lie behind and within the tales. Guidance notes, lesson plans and activity questions are included with every story and there is a companion website including extra resources for you to use on your interactive whiteboard. **Once Upon an If** draws on Peter's ten years of experience as a philosophy teacher, trainer and storyteller to help any teacher place stories and storytelling where they should be, back at the heart of teaching. **The Conscious Teacher** Deborah Nichols Poulos, 2020-01-13 **The Conscious Teacher** is about all kinds of strategies and techniques educators might employ to become more effective teachers. In an accessible conversational style, Deborah Nichols Poulos presents unique approaches to teaching that will inspire new and veteran teachers alike. She begins with her personal story of not being able to read all through elementary school. Her early failures convinced her she was dumb. At first she struggled but when she still failed she adopted an avoidance strategy that served her well until junior high. An experience in the seventh grade flipped a switch and started her on a journey to becoming an outstanding student and later to applying the lessons she learned as a child to her own teaching. What makes **The Conscious Teacher** unique are the inspirational lessons that are unlike what most teachers get in their teacher education courses or student teaching. Ms Nichols Poulos points out, for example, that from the very first day it is important that students learn they will be treated with dignity and respect, no matter what. And especially helpful are the steps Ms Nichols Poulos employs to set up a behavior management plan that works. She explains the strategic steps she takes before school starts, how essential it is to get to know each student before they walk into class on that first day. She also illustrates how setting up classroom routines helps students know what to

expect and how to make the best use of every minute And she emphasizes the importance of the parent student teacher team and includes many examples of how to communicate with and involve parents even those who may be difficult Foundational to her program are reading and writing Among other things she lays out the steps for students even as early as fourth grade to write five paragraph essays and their own student authored books and to research and write reports that include bibliographies When she differentiated curriculum to support all students needs she found their learning accelerated All teachers will appreciate her ideas about how to teach the basics of math as well as advanced math concepts And her ideas for teaching the arts are inspirational as she describes in detail how her fourth graders performed Shakespeare s Hamlet Macbeth King Lear Julius Caesar and A Midsummer Night s Dream She also shows how to integrate social studies with literature and writing Her experiences taught her that young students are much more capable than many people realize The Conscious Teacher is an indispensable guide for all new teachers Many of the ideas Ms Nichols Poulos provides will also be an eye opener for parents and experienced teachers as well The Conscious Teacher is simply a must have for anyone truly interested in giving young children a positive and solid foundation for their later schooling
