## **Structured Programming Logic:**

**Tools for Structured Design** Marilyn Bohl, Maria Rynn, 2001 The author's objective is to analyze a problem and express its solution in such a way that the computer can be directed to follow the problem solving procedure Emphasis is placed on maintaining an overall structure in program design and pseudo code is shown as an alternative or supplement to flow charting Analyzing techniques of top down modular program development fosters the reader's inquisitiveness In this fifth edition much new information has been added including a new chapter on modularization This book will easily fit as the core text for any course covering programming logic and design or structured programming

**Tools for Structured and Object-oriented Design** Marilyn Bohl, Maria Rynn, 2008 This text offers a concept oriented approach against an example oriented approach with many step by step examples that support the concepts It adds a new chapter that explores object oriented programming concepts in a language independent manner

*Logic and Structured Design for Computer Programmers* Harold J. Rood, 2000 LOGIC AND STRUCTURED DESIGN is an introduction to the logic of data processing It is intended for those who plan but have not yet begun to study programming particularly those with little background in mathematics or logic The author avoids reference to specific programming languages isolating questions of logic from questions of syntax This approach enables readers to concentrate on the logic of problems The book walks readers through logical problems common to a variety of programming languages and provides the background in logic that many programming texts and courses assume

*Tools for Structured and Object-Oriented Design* Marilyn Bohl, Maria Rynn, 2008-01

*Structured Programming with COBOL Examples* Earl H.

Parsons, 2002-11 As the conversion of legacy systems continues the ability to understand embedded business rules becomes more and more critical This ability is directly related to the structure of the programs within those systems We also see the

need to teach structured programming to a new generation of programmers who must maintain the billions of lines of existing COBOL code The ultimate purpose of this text is to discuss how to judge the level of structure of a program We do this by defining structured programming and then discussing how a structured program can be built through the application of the concepts of coupling and cohesion We also show how embedded business rules of the program can be separated from the data and presentation functions The reader will be able to use to these skills to judge and to improve the structure of a new program or an existing program
