The Thinking Machine Charles Judson Herrick, 1929 This is a book about the natural history of human nature It is not a book about philosophy for philosophers It is a plain and straightforward statement for ordinary people of what another very ordinary sort of man who has considerable experience with the mechanisms of human life and how they work thinks about it all We all want to understand human nature better because it is our nature The better we understand it the more likely we are to get along with ourselves our neighbors and our surroundings in general We want to make life more worth while to get as much out of it as we can and to put as much into it as we can to make a better living and to have as much fun doing it as possible We need to know how we live what the apparatus of life is and how it works in order to make a better job of it Preface

Self and Substance in Leibniz Marc Elliott Bobro, 2006-01-16 There is a close connection in Gottfried Wilhelm Leibniz s mind between the notions of self and substance R W Meyer in his classic 1948 text Leibniz and the Seventeenth Century Revolution writes that the monad is nothing but a 1 repr sentation in both senses of the French word of Leibniz s personality in metaphysical symbols and there was under contemporary circumstances no need 2 to introduce this concept apart from propounding it It is not clear what Meyer means here except that from the consideration of

his own self in some way Leibniz comes to his concept of simple substance or monad Herbert Carr in an even earlier work notes that Leibniz held that the only real unities in nature are formal not material and for a long time Leibniz was content to call the formal unities or substantial forms he was speaking about souls This had the advantage that it referred at once to the fact of experience which supplies the very 3 type of a substantial form the self or ego Finally Nicholas Rescher in his usual forthright manner states that in all of Leibniz's expositions of his philosophy 4 the human person is the paradigm of a substance
