# The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the people you want to work for. This includes understanding their work styles, their preferences for work environments, and their needs for flexibility and autonomy.

The way to build a hybrid work model is to start with the people and work backwards. This means understanding the needs and preferences of the people you want to work for, and then designing a hybrid work model that meets those needs.

How do you know if you've designed a hybrid work model that meets the needs and preferences of the people you want to work for? The answer is simple: you know when you've heard the employees say "yes".

It's important to remember that a hybrid work model is not a one-size-fits-all solution. It's a model that needs to be tailored to the needs and preferences of the people you want to work for.
