Mirlan Aldayarov,Istvan Dobozi,Thomas Nikolakakis,2017-02-27 The large scale transformation of Kazakhstan s power sector following independence in 1991 was reflected by the country s move toward liberalizing the market and implementing sector regulation As an early adopter of a liberalized multimarket model consisting of bilateral spot balancing ancillary and capacity submarkets Kazakhstan s power sector was regarded a market reform leader among countries of the former Soviet Union having achieved a much improved supply and demand balance and service quality However despite the noteworthy headway sector reforms remain predominantly as unfinished business The excess generation capacity that was inherited from the former Soviet Union at a time when the energy only market prices were too low to attract serious investors has masked the need to reflect on the long term outlook of the country s power production As the investment crunch unfolded in the mid 2000s a diverging concern almost immediately arose that is the capacity additions of existing and planned generations may not be sufficient to keep pace with the perpetuating and significant increase in the demand for power Instead of applying market mechanisms to allow prices to rise and reflect the underlying supply and demand gap the GoK addressed the issue by implementing administrative command and control measures This study draws on the World Bank s long standing

engagement in Kazakhstan's energy sector and a number of recent technical assistance and advisory support activities. The study aims to i) objectively identify the principal challenges faced by the Kazakhstan power sector in its ongoing transition and outlining potential policy options and ii) draw lessons from Kazakhstan's experience in sector reforms for the broader international audience. The study covers broader sector issues including long term least cost power system planning supply and demand balancing tariff setting market structure and integration of renewable energy.

**Climate Change and Disadvantaged Communities** Sk Ajim Ali, Quoc Bao Pham, Yunqing Xuan, 2025-12-09. As climate change accelerates so does the urgency to understand and address its unequal impacts. This book explores the uneven impacts of climate change and how it affects the lives and livelihoods of climate disadvantaged communities by highlighting the specific challenges they face such as heatwaves droughts flooding health issues and economic losses. It explains why vulnerable populations are more at risk due to factors such as lack of infrastructure poverty and limited access to resources. This book offers insights on conceptual frameworks to help vulnerable communities adapt and become more resilient to climate impacts. Real life examples with challenges and actionable suggestions aim to inform policymakers and the public about the urgent need for targeted initiatives. Features: Provides a comprehensive examination of how marginalized groups from indigenous populations in the Niyamgiri Hills to urban slum dwellers in Asia are disproportionately affected by climate change and what can be done to mitigate these impacts. Includes practical examples from different countries to help understand the intersection between climate change and social inequality. Utilizes advanced technologies and provides cutting edge tools such as geospatial maps and diagrams for modelling climate threats and predicting climate related challenges. Provides a roadmap for more resilient and inclusive future strategies. Highlights interdisciplinary discussions and contributions by various stakeholders to reach different audiences and offer regional problem solving opportunities. This book serves as a valuable resource for a wide audience including climate scientists geographers ecologists geologists urban planners environmentalists research scholars and policymakers engaged in the fields of environmental management climate justice and sustainable development. By featuring the voices and experiences of disadvantaged communities this book contributes meaningfully to the ongoing debates of climate justice sustainable development and equitable adaptation pathways.

**A Framework for State-level Renewable Energy Market Potential Studies** Claire Kreycik, 2010. State level policymakers are relying on estimates of the market potential for renewable energy resources as they set goals and develop policies to accelerate the development of these resources. Therefore accuracy of such estimates should be understood and possibly improved to appropriately support these decisions. This document provides a framework and next steps for state officials who require estimates of renewable energy market potential. The report gives insight into how to conduct a market potential study including what supporting data are needed and what types of assumptions need to be made. The report distinguishes between goal oriented studies and other types of studies and explains the benefits of each.

**Renewable Energy Framework** Malte Gephart, Lucie Tesnière, 2015      **Case Studies on Bioenergy Policy and Law**  
Elisa Morgera, Kati Kulovesi, Ambra Gobena, 2009 Sound policy and legal frameworks for bioenergy are necessary to ensure that socio economic and environmental sustainability considerations are taken into account in the production promotion and use of bioenergy Through a series of case studies this publication identifies specific recommendations for policy makers and legal drafters      Water, Sustainable Development and the Nexus Velma I. Grover, Amani Alfarra, 2019-08-30 Water is intricately linked with food security energy security and sustainable development As the world is moving towards sustainable development goals it is critical to recognize the role of water in attaining these goals The Water Energy Food Nexus draws attention to the complex and interrelated nature of global resource systems and forces us to think about how a decision in one sector impacts other interlinked sectors as well This book looks at the three dimensions of sustainable development environment economics and society and how water is linked with them and explores the nexus approach as a framework to look at the issues and identify solutions      Sustainable Energy Access Planning Ram M. Shrestha, Jiwan S. Acharya, 2015-06-01 Sustainable energy access planning unlike traditional energy planning gives primary importance to the energy demand of both poor and nonpoor households the need to make cleaner energy services more affordable to the poor the costs of both supply side and demand side access options and the sustainability of technology and resource options As such this type of energy planning contributes to low carbon development and achievement of Sustainable Energy for All objectives This report presents a framework for sustainable energy access planning that planners and policy makers can use to design cost effective clean energy supply systems that both poor and nonpoor can sustainably access to meet at least the minimum amount of energy for their basic needs The report discusses the multidimensional assessments involved in this type of planning as well as their interlinkages and implementation issues      *Renewable Energy Local Investment Framework* Australian Capital Territory, 2014
