AI-Driven Solutions for Solar Energy Efficiency, Irradiance Modeling, and PV Forecasting Alexandria, Auzuir Ripardo de,Upadhyay, Prashant,Galletta, Antonino,Sharma, Yashaswini,Yadav, Satya Prakash,2025-08-08 The issue of intermittency or variations in solar irradiance caused by weather time of day and geographic considerations confronts the solar energy industry Because of this unpredictability precise forecasting and effective management of solar power generation are essential for a steady supply of energy Simultaneously artificial intelligence AI approaches in particular machine learning ML deep learning DL and neural networks have shown promise in resolving intricate nonlinear issues across a range of areas However the utilization of these

technologies for projecting solar irradiance and optimizing energy management is yet to be explored in depth necessitating specific skills and methods to properly tap into their potential AI Driven Solutions for Solar Energy Efficiency Irradiance Modeling and PV Forecasting examines the relationship between solar energy and AI with a particular emphasis on how AI driven methods can improve solar power systems performance efficiency and forecasting It illustrates how AI based optimization algorithms may maximize energy output and reduce losses in photovoltaic PV systems and solar power plants Covering topics such as charge management microgrids and smart building designs this book is an excellent resource for engineers executives policymakers technologists environmental advocates business leaders investors professionals researchers scholars academicians and more
