Swindon Apprentice:

Great War Railwaymen Jeremy Higgins,2015-09-03 The railways were intrinsic to fighting the First World War whether at home or abroad On the Western Front and beyond trains ferried men and supplies to and from the front on a staggering scale ensuring that the war machine functioned without pause Back in Britain the railway network shipped millions of tonnes of war material from the factories to the ports becoming the lifeblood of the war effort *Great War Railwaymen* details this incredible achievement exploring not only the vast infrastructure but also those who operated it Despite the importance of the railways many of those involved in the industry went off to fight in the mud and trenches on the world's oceans or in the skies above war-torn Europe Between them they were awarded 2500 Military medals 44 Distinguished Conduct Medals 27 Military Crosses and 6 Victoria Crosses This is their story Meticulously researched and lovingly produced Jeremy Higgins narrates the fascinating stories of over a thousand of these men vividly capturing their wartime experiences and pressing home the vital importance of the railways and those that ran them to the Allied victory in the First World War *Report India*. High Commissioner in London. Education Dept,1914 **Science Examinations ... Reports, Etc** ,1906 **An Introduction to Great Western Locomotive Development** Jim Champ,2018-02-28 The first thought when contemplating a new study of the Great Western Railway locomotive fleet must surely be to ask what can there be left to say But there is no single source which gives a general introduction to the Great Western locomotive fleet There are monographs on individual classes an excellent multi-volume detail study from the RCTS and superb collections of photographs but nothing that brings it all together This work is intended to provide that general introduction The volume begins with a series of short essays covering general trends in design development whilst the main body of the volume covers individual classes For each class there is a small table containing some principal dimensions and paragraphs of text covering an introduction renumbering key changes in the development of the class and information on withdrawal The volume concludes with appendices covering the development and types of standard boilers the various numbering schemes used by the GWR the arcane subject of locomotive diagrams and lot numbers and a short reference on the many lines the GWR engulfed The majority of illustrations are new profile drawings to a consistent format Described as sketches they are drawn to a consistent scale but do not claim to be scale drawings Much minor equipment has been omitted and the author has certainly not dared to include rivets Although most are based around GWR weight diagrams they are not simple traces of the original drawings Detail has been added from other sources components copied from different drawings and details have been checked against historical and modern photographs One must also bear in mind that steam locomotives were not mass produced Minor fittings frequently varied in position and changes were made over the locomotives lifetimes Nevertheless this collection of drawings provides a uniquely consistent view of the GWR locomotive fleet **Decisions** Great Britain.
