Word Order and Parameter Change in Romanian Alexandru Nicolae, 2019-06-06 The book provides a comprehensive description and in depth analysis of the major word order changes that took place in the clausal and the nominal domains in

the transition from old to modern Romanian The data are set in a comparative Romance perspective with attention also paid to the impact of the Balkan Sprachbund and the influence of Old Church Slavonic Alexandru Nicolae's analysis is based on a qualitative and quantitative examination of a large number of phenomena in a representative corpus of old Romanian texts Some of these phenomena such as scrambling interpolation discontinuous constituents and variation in the position and linearization of DP internal adjectival modifiers are found across Romance while others such as the low position for pronominal cliticization are relatively rare Still others are specific to old and modern Romanian such as the proclitic and enclitic realization of the same pronominal clitic the low definite article and the adjectival article construction From an empirical perspective the volume fills a gap in the Romance linguistics literature as several of the phenomena it explores have been largely neglected to date More broadly it offers a valuable contribution to research into word order typology and change the nature and content of syntactic parameters and the theory of grammaticalization and syntactic change

Infinitives at the Syntax-Semantics Interface Lukasz Jędrzejowski, Ulrike Demske, 2017-06-26 The major aim of this

volume is to investigate infinitival structures from a diachronic point of view and simultaneously to embed the diachronic findings into the ongoing theoretical discussion on non finite clauses in general All contributions subscribe to a dynamic approach to infinitival clauses by investigating their origin development and loss in miscellaneous patterns and across different languages

Locality and the Architecture of Syntactic Dependencies L. The New Comparative Syntax Liliane M. V. Haegeman,1997 Drawing upon recent theoretical developments and empirical discoveries this book provides a coherent and comprehensive introduction to generative research in this field Dr Haegeman brings together ten chapters to illustrate the new approach to comparative grammar which has developed against the background of the principles and parameters model The contributors show how this framework guides empirical research by seeking to reveal the underlying grammatical basis for similarities and differences between languages and language groups Throughout the text attention is drawn to the ways in which empirical study feeds into theory construction raising new questions for the overall conceptual framework and sometimes providing new solution

Rich Descriptions and Simple Explanations in Morphosyntax and Language Acquisition Giuliano Bocci,Daniele Botteri,Claudia Manetti,Vincenzo Moscati,2024-07-12 This volume offers new perspectives on the tension between the rich patterns of language variation that emerge from comparative studies and the quest for simple theoretical primitives The chapters explore the debate between Cartography and Minimalism on the one hand the need for detailed and articulated descriptions of the clausal architecture and on the other the endeavor to reduce the theoretical apparatus to fundamental computational mechanisms The first part of the book begins with a reflection on the goals of modern linguistic theory and investigates the principles of human language in an effort to subsume the regularities of particular grammars under a small set of morphosyntactic and semantic primitives The second part examines the clausal structure both the CP layer and the IP layer from a comparative perspective which directly relates to the fundamental questions of universality linguistic variation and learnability addressed in the first part of the book With chapters written by world leading linguists who analyze a wide range of old and new phenomena the volume will be a valuable resource for researchers and students interested in theoretical linguistics and language development

Romania Peter Siani-Davies,Mary Siani-Davies,1998 The Revolution of 1989 dramatically brought Romania to international prominence as an absorbed world watched the bloody aftermath of the overthrow of Nicolae Ceausescu live in television These pictures of violence were soon joined by others including those depicting the plight of children placed in state care which brutally revealed the extent of the country s suffering under Communism

Verb Movement and Clause Structure in Old Romanian Virginia Hill, Gabriela Alboiu, 2016-04-29 The book provides a formal analysis of root and complement clauses in Old Romanian Virginia Hill and Gabriela Alboiu examine the combination of Balkan syntactic patterns such as generalized subjunctive complementation on the one hand and the Romance morphology that supplies complementizers and grammatical mood forms on the other The consequences of this mixed typology range from root clauses with non finite verbs to split heads and repeated recycling in clausal complements The book argues that discourse triggers at the left periphery are responsible for fluctuations in verb movement in finite clauses while with gerunds and imperatives verb movement follows from functional constraints It further argues that clausal complements to control and raising verbs systematically display the pattern of the Balkan subjunctive and that the spell out of these clausal complements has been repeatedly recycled during the development of Romanian **Verb Movement and Clause Structure in Old Romanian** presents a new perspective on the manifestation of Balkan Sprachbund properties in the language and on the nature of parametric differences in relation to other Romance languages It provides a unified explanation for a range of constructions that have previously been treated as separate phenomena and places diachronic changes in Romanian in a wider context
