Reliability Abstracts and Technical Reviews, 1969 [An Introduction to System Effectiveness](#) Herbert S. Dordick, 1965 The paper is an introduction to a working session on system effectiveness defined by the office of Naval Material as a measure of the extent to which a system can be expected to complete its assigned mission within an estimated time frame under stated environmental conditions For systems effectiveness not only must reliability and maintainability parameters be considered but each of these must be traded off with performance criteria Defining effectiveness measures for the designer shifts from the research orientation of looking for basic principles to techniques for organizing design performance managing the design performance and setting up a structure of project management within which the designer must work

Program Manager, 1981 [Technical Abstract Bulletin](#), *System Effectiveness Model Formulation*, 2008 Evaluation of system effectiveness has numerous pitfalls System objectives may be poorly defined may shift during the system life or may be hard to quantify Further individual perceptions of the quantifications may differ Whatever the cause system effectiveness has been an elusive term to quantitatively define The proposed model presents a quantitative system effectiveness model and establishes a utilitarian approach for its use with the illustrative application to a nuclear safeguards system The model uses the Type I and Type II statistical error rates as input to the component or subsystem effectiveness calculation which when combined using a utilitarian methodology quantify the overall system effectiveness The methodology will use a survey of expert judgment to determine the relative importance of the individual subsystems through a statistically designed web survey The web based survey will be available to nuclear material protection control and accounting experts attending the 2008 INMM conference This model and methodology will provide a repeatable quantifiable measure for any system but in this case a simple safeguards system is used as an example [Accounting Systems, Principles and Problems of Installation](#) George Edward Bennett, 1926 **SAE Transactions** Society of Automotive Engineers, 1914 Beginning in 1985
