

# Systematic Error

## Instrumental Error

The scale is improperly calibrated so it reads 2mg even with nothing on it. This causes the the beaker to appear 2mg heavier than it would be, and any other measurements would read 2mg heavier than what they actually weigh

## Environmental Error

The Geiger counter shows the radiation, however, when a cell phone is near the Geiger counter, the radiation is read as greater than what it actually is because the cell phone is radiating RF waves which disrupts the reading

## Observational Error

The observer looks at the beaker from above eye level and write down the volume as 40mL, when in reality when looked at eye level you can see the liquid has a volume of about 42mL
