*Uvérite* Bahram Bodaghi, Phuc LeHoang, 2009. L'uvérite est une inflammation primitive de la tunique intermédiaire de l'œil. Elle peut toucher les patients tout âge et représente la troisième cause de cécité dans le monde. Sa prise en charge doit être méthodique car ses étiologies sont extrêmement variées. Elles peuvent être limitées à l'œil ou associées à une maladie de système d'origine auto-inflammatoire ou infectieuse bénignes ou potentiellement cicatricielles. L'analyse d'une uvérite nécessite une démarche raisonnée précise souvent multidisciplinaire basée sur un examen sémiologique complet d'une part et des examens complémentaires parfois sophistiqués d'autre part. Voici le premier ouvrage de référence francophone sur le sujet. La première partie regroupe l'ensemble des données générales portant sur les mécanismes immunologiques les dernières classifications disponibles les diagnostics différentiels les investigations étiologiques ou fonctionnelles et enfin les stratégies thérapeutiques médico-chirurgicales ainsi que la prise en charge des complications. Chaque entité spécifique est ensuite présentée avec précision dans la deuxième partie de l'ouvrage. Enfin les grands syndromes inflammatoires et infectieux sont revus dans les derniers chapitres sous forme de conduites à tenir incluant des arbres décisionnels afin de faciliter leur mémorisation. Une place de choix a été réservée aux différentes modalités d'imagerie et aux techniques d'analyse moléculaire utilisées vis-à-vis du diagnostic. Ce livre est un guide pratique rédigé par plus d'une cinquantaine d'experts francophones ou anglo-saxons. Il s'agit d'un outil indispensable pour tout ophtalmologiste interniste rhumatologue neurologue pédiatre ou gériatrique prenant en charge des patients atteints d'uvérite. Il sera également utile aux internes et assistants en formation qui souhaitent compléter leurs connaissances dans un domaine aussi vaste que celui de l'inflammation intraoculaire.

Gérontologie et gérontopsychiatrie Marie-Pierre Hervy, Valérie Béguin, 2005. Cette quatrième édition du cahier n° 20 recouvre le programme du module Soins infirmiers aux personnes âgées et gérontopsychiatrie du diplôme d'état. La durée de vie de la population française augmente régulièrement ce qui montre l'efficacité des programmes de prévention et de traitement des maladies. Cependant à partir du moment où intervient la perte partielle puis complète de l'autonomie la perspective du maintien au sein de la famille et dans la société ainsi que les difficultés de prise en charge qui en découlent prennent le relais de la pathologie proprement dite. La mise jour de l'ouvrage tient compte tout particulièrement des différentes modalités de l'allocation personnalisée de l'autonomie et des changements dans les services d'aides domicile mais aussi du développement des établissements d'hébergements pour les personnes âgées dépendantes et des services de soins.
