**Fragments of the World: Uses of Museum Collections** Suzanne Keene, 2006-08-11 During the past decade a number of individual museums have found imaginative ways of using their collections and of making them accessible However museum collections as a whole are enormous in size and quantity and the question of how can they can be put to best use is ever present When conventional exhibitions can only ever utilise a tiny proportion of them what other

uses of the collections are possible Will their exploitation and use now destroy their value for future generations Should they simply be kept safely and as economically as possible as a resource for the future Fragments of the World examines these questions first reviewing the history of collecting and of collections then discussing the ways in which the collections themselves are being used today Case studies of leading examples from around the world illustrate the discussion Bringing together the thinking about museum collections with case studies of the ways in which different types of collection are used the book provides a roadmap for museums to make better use of this wonderful resource Guide to Photographic Collections at the Smithsonian Institution: National Museum of American History Smithsonian Institution, Diane Vogt-O'Connor, 1989 This essential reference volume the first in a five volume set describes a million photographs at the National Museum of American History for curators researchers historians artists filmmakers and collectors See Photography for other volumes in this series *Department of the Interior and Related Agencies Appropriations for Fiscal Year 1994* United States. triangulating the Greco Roman world classical reception and disability studies this book presents a range of approaches that reassess and reimagine traditional themes from the narrative voice to sensory studies It argues that disability and disabled people are the forgotten other of not just Classics but also the Humanities more widely Beyond the moral merits of rectifying this neglect this book also provides a series of approaches and case studies that demonstrate the intellectual value of engaging with disability studies as classicists and exploring the classical legacy in the medical humanities The book is presented in four parts Communicating and controlling impairment illness and pain Using creating and showcasing disability supports and services Real bodies and retrieving senses disability in the ritual record and Classical reception as the gateway between Classics and disability studies Chapters by scholars from different academic backgrounds are carefully paired in these sections in order to draw out further contrasts and nuances and produce a sum that is more than the parts The volume also explores how the ancient world and its reception have influenced medical and disability literature and how engagements with disabled people might lead to reinterpretations of familiar case studies such as the Parthenon This book is primarily intended for classicists interested in disabled people in the Greco Roman past and in how modern disability studies may offer insights into and reinterpretations of historic case studies It will also be of interest to those working in medical humanities sensory studies and museum studies and those exploring the wider tension between representation and reality in ancient contexts As such it will appeal to people in the wider Humanities who notwithstanding any interest in how disabled people are represented in literature art and cinema have had less engagement with disability studies and the lived experience of people with impairments
